

Constraint Management Service Summary Report: Tender Rounds 3

Introduction

This Summary Report is produced after each tender round and is designed to give existing and potential providers of the Constraint Management Service an overall view of tendered availability prices and the magnitude of the price caps for offers and bids, together with the type and size of the tendered plant. For further information regarding the Constraint Management Service please consult the Balancing Services section of National Grid's website:

http://www.nationalgrid.com/uk/Electricity/Balancing/services/systemsecurity/constraint_agree/

Tender Round 3 Summary

Constraint Management Period: 2nd June - 27th June 2008

Site	Fuel Type	Indicative Maximum Tendered MW	Tender Type	Availability Payment Rate	Bid Index Margin
Peterhead Power Station	Gas	614 MW	Index Linked	£8.45/MWh	£3.25/MWh

One index-linked tender was received from SSE's Peterhead Power Station. The tender was rejected because the combination of the Availability Payment Rate and the Bid Index Margin were assessed to be uneconomic compared to forecast alternatives.
