

Grid Code Review Panel - Generic Provisions Working Group (GPWG)

TERMS OF REFERENCE

1. Objectives

The following two basic objectives have been identified as a viable starting point. However, subsequent investigations may lead to these being modified depending on outcomes :

- Develop generic provisions to include for all existing and anticipated generation systems and interconnector technology developments where a 'constant' source or sink of energy is normally available. This will consider embedded and direct transmission system connection together with the technical interaction and operational co-ordination issues.
- As above, but where an 'intermittent' source or sink of energy is normally available.

2. Membership and Reporting

The group **GPWG** will comprise: -

Chairman (National Grid)
Secretary (National Grid)

A N Others – GCRP Representatives or other nominees

The Chairman of the group will report to the **GCRP** on the work progress.

3. Deliverables

The group will produce: -

Grid Code change proposals as part of a report that covers the objectives of the Working Group and how these were met.

4. Timescales

A kick –off meeting is planned for mid-October 2002 at National Grid House.

A brief progress report would be produced for the 6th February 2003 GCRP meeting.

A final report and Grid Code change proposals would be produced for the 22nd May 2003 GCRP meeting.
