Dear Richard,

**UoSCM-M-03: Calculation of TNUoS Demand Charges and Allocation of Triad Benefits for Trading Units with more than One Supplier BM Unit**

I am writing to inform you that the Authority has decided to veto the above modification to NGC's Use of System Charging Methodology. This modification is only necessary if Alternative Proposed Modification P7 to the BSC is approved. The Authority can not be certain it will be in a position to decide whether to approve or not approve the BSC modification before the expiry of the 28 day period on the expiry of which NGC must implement UoSCM-M-03 unless directed otherwise by the Authority. In this case it would be inappropriate for the charging methodology modification to precede the BSC modification as the Authority's discretion may be fettered in relation to its decision on the latter or alternatively the methodology change could become inappropriate.

In accordance with Supplementary Condition C7A(4) of the transmission licence the Authority directs NGC not to make modification UoSCM-M-03 to NGC's Use of System Charging Methodology.

Yours sincerely

**Andrew Walker**  
Director, Regulation and Financial Affairs
