Gemini Price History

# Price Information History

---

- Since 18<sup>th</sup> October 2005 Price Information History Screen on Gemini has not been used as this data is published via System Balance Status Information.
- The Price Information History screen will remain and will display data prior to 18<sup>th</sup> October 2005 but will not be populated after this date due to a rationalisation of screens being used by the National Control Centre.
- System Balance Status Information History screen should be used to view Price information.
- Any APIs should utilise System Balance Status Information History data after 18<sup>th</sup> October 2005.
