The work you propose may cause a significant risk to our gas apparatus.

We request that you contact National grid well in advance of commencement of works

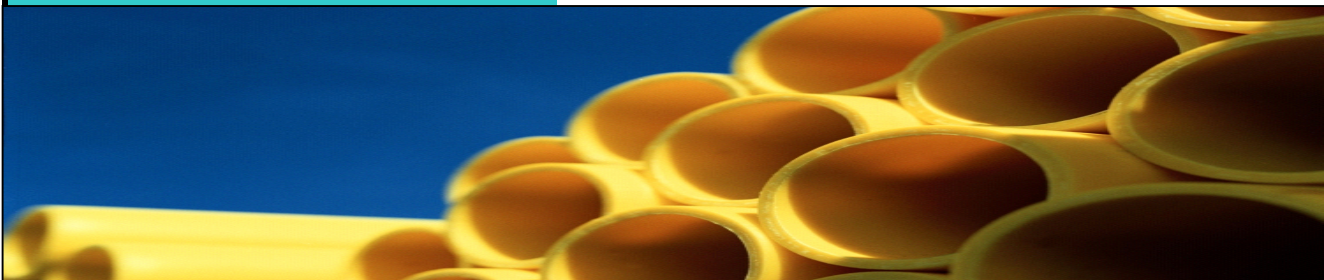

A site meeting may be arranged to enable an Engineer to consider the suggested programme of works and the safety and integrity of National Grid's Gas plant.

The safety of Operatives and the Public is of paramount importance and is a major part of the need for damage prevention.

Your assistance is appreciated.

The information included on the enclosed map should not be referred to beyond a period of 28 days from date of issue.

If physical works are due to take place outside this period you must contact National Grid (Plant Protection) to obtain an up to date plan.
