

Interconnector Outage Programme 2008/09

(Revised 10th March 2008)

There is a programme of planned outages for routine maintenance reasons at various times and of varying lengths on each of the interconnector circuits. Where an outage of 500MW is indicated a further 500MW outage at the beginning and end of each outage will be required, resulting in a brief reduction in the interconnector capability totalling 1,000MW lasting typically less than one hour.
