

# CUSC Amendment Proposal CAP141 - Amendments Panel Vote

---

Clarification of the Content of a Response to  
a Request for a Statement of Works

# CUSC Amendment Proposal CAP141

## *Proposed Amendment and Working Group Alternative*

---

### **Original**

- ◆ Aims to amend CUSC to clarify National Grid's response when responding to a Request for a Statement of Works in accordance with CUSC 6.5.5
- ◆ This process was introduced by CAP097 - Revision to the contractual requirements for Small and Medium Embedded Power Stations under CUSC 6.5 and implemented on 14th July 2006

### **Working Group Alternative**

- ◆ WGAA is based on the Original and addresses the same defect
- ◆ WGAA develops the Statement of Works Exhibit and creates a new process for Users to respond to National Grid following a Statement of Works, called the Confirmation of Project Progression.
- ◆ Confirmation of Project Progression will be treated as a deemed Modification Application for the purposes of the Charging Statement

# CUSC Amendment Proposal CAP141

## *Consultation Alternatives*

---

### **CAA – A**

- ◆ CAA – A is based on the original and was raised by SHEPD
- ◆ It addresses the same defect but amends the legal drafting to remove the requirement on the DNO to forward the Statement of Works to the generator

### **CAA – B**

- ◆ CAA – B is based on the WGAA and was raised by SHEPD
- ◆ It addresses the same defect but amends the legal drafting to remove the requirement on the DNO to forward the Statement of Works to the generator
- ◆ Plus removes the sentence that quantifies significant impact on the transmission system because the proposer believes that the definition and scoping of significant system impact needs to be fully debated by the Industry and not by CAP141
