

TCMF

2007 Work Review

Zoning

- ◆ Consultation to consider:
 - ◆ Indexation of +/-£1/kW zoning criteria, in line with expansion constant calculation to provide greater stability
 - ◆ Definition of 'exceptional circumstances' in the Statement of the Use of System Charging Methodology to provide further transparency

Charging model data

- ◆ Charging Methodology had to be changed at short notice to deal with data changes that were notified after the publication of the October SYS update
- ◆ Consider options on an enduring solution to avoid this problem in the future
- ◆ Interaction with CAP131 (User Commitment for New and Existing Generators)

Treatment of substation costs

- ◆ Work on charging arrangements for SQSS design variations led to questions about the treatment of substation costs
- ◆ Analysis to investigate this further required
