Our Reference GB ECM-06

Dear Bob,

CONCLUSIONS REPORT FOR THE MODIFICATION PROPOSAL TO THE TRANSMISSION NETWORK USE OF SYSTEM CHARGING METHODOLOGY FOR THE CHARGING ARRANGEMENTS ASSOCIATED WITH SQSS DESIGN VARIATIONS BASED UPON CUSTOMER REQUESTS

GB ECM-06

Please find attached, the conclusions report for the Use of System Charging Methodology modification proposal GB ECM-06 concerning the charging arrangements for SQSS design variations for single circuit connections.

In accordance with Standard Condition C5 of the Transmission Licence, the report sets out:

- (a) the terms originally proposed for the modification;
- (b) the representations made by Users;
- (c) any changes made to the terms of the modification intended as a result of such representations;
- (d) how the intended modification better achieves the relevant objectives; and
- (e) a timetable for implementation of the modification.

In accordance with Standard Licence Condition C5, National Grid will modify the Use of System charging methodology after a period of 28 days should the Authority not give direction that the modification may not be made within this period.

We will be publishing the conclusions report to all concerned parties in parallel to this letter and will be posting this report on the National Grid charging website.

If you have any queries please do not hesitate to contact me.

Yours sincerely,

Hêdd Roberts
Electricity Charging and Access Development Manager
