

Stage 02: Industry Consultation

Grid Code

H/11 Update Issue Number for “Data Validation, Consistency and Defaulting Rules” document.

What stage is this document at?

- | | |
|----|-------------------------|
| 01 | Working Group Report |
| 02 | Industry Consultation |
| 03 | Report to the Authority |

This proposal seeks to modify the Grid Code to update the “Data Validation, Consistency and Defaulting Rules” document definition from Issue 7 to Issue 8. The “Data Validation, Consistency and Defaulting Rules” document is referenced in the Glossary and Definitions in the Grid Code.

This document is open for Industry Consultation. Any interested party is able to make a response in line with the guidance set out in Section 4 of this document.

About this document

The Data Validation, Consistency and Defaulting Rules document defines the rules for data validation and consistency checking which are applied to Balancing Mechanism data received from Trading Agents and Control Points. It also covers defaulting rules in the absence of data.

The Data Validation, Consistency and Defaulting Rules document is referenced in the Grid Code Glossary and Definitions. The current version referenced is Issue 7; it is proposed to update the reference to Issue 8. Following the consultation a report will be produced for the Authority summarising the views of respondents.

1 Executive Summary

The Data Validation, Consistency and Defaulting Rules document defines the rules for data validation and consistency checking which are applied to Balancing Mechanism data received from Trading Agents and Control Points. It also covers defaulting rules in the absence of data.

National Grid has proposed a number of changes to the Data Validation, Consistency and Defaulting Rules document. The changes that have been proposed are the subject of a separate consultation and can be viewed via the link below:

<http://www.nationalgrid.com/uk/Electricity/Codes/gridcode/consultationpapers/>

The current version of the Data Validation, Consistency and Defaulting Rules document is Issue 7, when changes are made to the document the reference to the document in the Grid Code needs to be updated. This modification proposal is to update the Grid Code reference to Issue 8. This modification will only be implemented if the changes proposed to the Data Validation, Consistency and Defaulting Rules document (link above) are made.

2 Description of Proposed Modification and its Effects

This modification is to change the reference for the Data Validation, Consistency and Defaulting Rules document in the Grid Code Glossary and Definitions from Issue 7 to Issue 8. This modification will only be implemented if the changes proposed to the Data Validation, Consistency and Defaulting Rules document are implemented. Changes proposed to the Data Validation, Consistency and Defaulting Rules document is the subject of a separate consultation which can be viewed on the link below.

3 Impacts & Assessment

3.1 Impact on National Electricity Transmission System (NETS)

The proposed change will not have a material impact on the National Electricity Transmission System.

3.2 Impact on Grid Code Users

The proposed modification will result in Grid Code Users data being subject to Issue 8 of the Data Validation, Consistency and Defaulting Rules associated Grid Code document.

3.3 Impact on Greenhouse Gas emissions

The proposed modification will have no material impact on Greenhouse Gas emissions.

3.4 Assessment against Grid Code Objectives

National Grid considers that H/11 would better facilitate the Grid Code objectives overall:

- (i) to permit the development, maintenance and operation of an efficient, co-ordinated and economical system for the transmission of electricity;
- (ii) to facilitate competition in the generation and supply of electricity (and without limiting the foregoing, to facilitate the national electricity transmission system being made available to persons authorised to supply or generate electricity on terms which neither prevent nor restrict competition in the supply or generation of electricity) ; and
- (iii) subject to sub-paragraphs (i) and (ii), to promote the security and efficiency of the electricity generation, transmission and distribution systems in the national electricity transmission system operator area taken as a whole.

By ensuring that the Grid Code Definitions refer to the current version of all Grid Code Associated documents.

3.5 Impact on Industry Documents

3.5.1 Impact on core industry documents

The proposed modification does not impact on any core industry documents.

3.5.2 Impact on other industry documents

The proposed modification does not impact on any other industry documents.

4 Responses

4.1 Views are invited upon the proposals outlined in this report, which should be received by 28th December 2011. Following the consultation a report will be produced for the Authority summarising the views of respondents.
