16 March 2010  
Our Reference GB ECM-21

Dear Stuart,

**Conclusions report for GB ECM-21 - Implementing a mid year tariff change**

Please find attached, the conclusions report for the Use of System Charging Methodology modification proposal GB ECM-21 concerning the implementation of a mid year tariff change.

In accordance with Standard Condition C5 of the Transmission Licence, the report sets out:

- (a) the terms originally proposed for the modification;
- (b) the representations made by Users;
- (c) any changes made to the terms of the modification intended as a result of such representations;
- (d) how the intended modification better achieves the relevant objectives; and
- (e) a timetable for implementation of the modification.

In accordance with Standard Licence Condition C5, National Grid will modify the Use of System Charging Methodology after a period of 28 days unless the Authority directs that the modification should not be made; or, the Authority notifies National Grid that it intends to undertake an impact assessment, in which case implementation will be three months after that notification unless the Authority directs that the modification should not be made.

We will be publishing the conclusions report to all concerned parties in parallel to this letter and will be posting this report on the National Grid charging website. If you have any queries please do not hesitate to contact me.

Yours sincerely,

Hêdd Roberts
