National Grid teams up with Sport Relief

- Football teams to battle it out for honours
- Employees go the extra mile in nationwide campaign
- Sports quiz and games help raise money for charities

24 Mar 2016

National Grid employees in Hinckley and Leicester dusted down their sporting credentials for another herculean effort in aid of Sport Relief.

Throughout the day they huffed and puffed as they tackled various sporting challenges to raise money for the charity.

But the big match is this evening when football fever hits Leicester. And it's not the heroics of the Premier title chasing Foxes that will draw the crowds.

It's a crunch match between rival National Grid teams.

National Grid East Midlands Operations will take on a side this evening of fellow employees from Customer Operations in Hinckley.

No doubt the game will be toughly fought until the final whistle sounds at the Riverside Ground in Braunstone.

Sally Clay, National Grid organiser, said: "National Grid teams have long supported Sport Relief and our efforts this year were exceptional. People have given up their own time to ensure successful fund raising. As always, they have gone the extra mile to help those less fortunate. We are all winners and we're expecting a bumper sum to be banked for a wonderful cause."

But, the real winners from today's events are the hundreds of UK charities, and millions of people around the world, helped by Sport Relief.

Apart from the "Big Match" National Grid staff organised a sports quiz, a cake bake-off, a pool competition, magnetic darts and wear-your-team-kit-to-work for a £1.

For the more energetic there was table tennis, badminton, basketball and volleyball.

To help make internet donations easier, for the first time National Grid volunteers set up virtual 'Just giving' pages.

Notes for editors

Notes to Editors:

National Grid is pivotal to the energy systems in the UK and the north eastern United States. We aim to serve customers well and efficiently, supporting the communities in which we operate and making possible the energy systems of the future.

National Grid in the UK:

- We own and operate the electricity transmission network in England and Wales, with day-to-day responsibility for balancing supply and demand. We also operate, but do not own, the Scottish networks. Our networks comprise approximately 7,200 kilometres (4,474 miles) of overhead line, 1,500 kilometres (932 miles) of underground cable and 342 substations.
- We own and operate the gas National Transmission System in Great Britain, with day-to-day responsibility for balancing supply and demand. Our network comprises approximately 7,660 kilometres (4,760 miles) of high-pressure pipe and 618 above-ground installations.
- As Great Britain's System Operator (SO) we make sure gas and electricity is transported safely and efficiently from where it is produced to where it is consumed. From April 2019, Electricity System Operator (ESO) is a new standalone business within National Grid, legally separate from all other parts of the National Grid Group. This will provide the right environment to deliver a balanced and impartial ESO that can realise real benefits for consumers as we transition to a more decentralised, decarbonised electricity system.
- Other UK activities mainly relate to businesses operating in competitive markets outside of our core regulated businesses; including interconnectors, gas metering activities and a liquefied natural gas (LNG) importation terminal – all of which are now part of National Grid Ventures. National Grid Property is responsible for the management, clean-up and disposal of surplus sites in the UK. Most of these are former gas works.
