### **Grid Guide To... The Future of Gas ESG virtual education series for investors**

National Grid will today host our 'Grid Guide To... The Future of Gas' virtual event. This is the first in our virtual education series on Environment, Social and Governance (ESG) topics.

The event will provide an opportunity to hear from our experts across our UK, US and NGV businesses, giving the market a deeper understanding of today's themes and the innovative projects we are working on.

Please [click here](#) to join us for today's event, which will begin at 14.00GMT (registration required).

Today's speakers will be:

John Pettigrew, CEO  
Cordi O'Hara, Chief Operating Officer, Gas  
Sheri Givens, VP Head of Regulatory Strategy  
Antony Green, Project Director – Hydrogen  
Martin Cook, Business Development Director, National Grid Ventures

There will be an opportunity for Q&A after today's presentations; to take part please use the phone numbers below, or the 'Ask a question' tab within the webcast screen.

Typed questions will be asked anonymously unless you request for yours to be attributed.

No material updates on current trading will be provided.

All presentations and a video recording will be made available on National Grid's investor [website](#) later today.

#### **Phone numbers to participate in the Q&A:**

United Kingdom (Local): 020 3936 2999  
United Kingdom (Toll Free): 0800 640 6441  
United States (Local): 1 646 664 1960  
All other locations: +44 20 3936 2999  
Participant access code: **560619** – you will be greeted by an operator to register

## CONTACTS

### Investors and Analysts

Nick Ashworth	+44 (0) 7814 355 590
James Flanagan	+44 (0) 7970 778 952
Jonathan Clay	+44 (0) 7899 928 247
Peter Kennedy	+44 (0) 7966 200 094
Caroline Dawson	+44 (0) 7789 273 241

### CAUTIONARY STATEMENT

This announcement contains certain statements that are neither reported financial results nor other historical information. These statements are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements include information with respect to National Grid's (the Company) financial condition, its results of operations and businesses, strategy, plans and objectives. Words such as 'aims', 'anticipates', 'expects', 'should', 'intends', 'plans', 'believes', 'outlook', 'seeks', 'estimates', 'targets', 'may', 'will', 'continue', 'project' and similar expressions, as well as statements in the future tense, identify forward-looking statements. These forward-looking statements are not guarantees of National Grid's future performance and are subject to assumptions, risks and uncertainties that could cause actual future results to differ materially from those expressed in or implied by such forward-looking statements. Many of these assumptions, risks and uncertainties relate to factors that are beyond National Grid's ability to control, predict or estimate precisely, such as the impact of COVID-19 on its operations, employees, counterparties, funding and legal and regulatory obligations, but also more widely in terms of changes in laws or regulations, including any arising as a result of the United Kingdom's exit from the European Union; announcements from and decisions by governmental bodies or regulators, including those relating to the RII0-T2 price control, as well as increased political and economic uncertainty resulting from COVID-19; the timing of construction and delivery by third parties of new generation projects requiring connection; breaches of, or changes in, environmental, climate change and health and safety laws or regulations, including breaches or other incidents arising from the potentially harmful nature of its activities; network failure or interruption, the inability to carry out critical non-network operations and damage to infrastructure, due to adverse weather conditions including the impact of major storms as well as the results of climate change, due to counterparties being unable to deliver physical commodities, or due to the failure of or unauthorised access to or deliberate breaches of National Grid's IT systems and supporting technology; failure to adequately forecast and respond to disruptions in energy supply; performance against regulatory targets and standards and against National Grid's peers with the aim of delivering stakeholder expectations regarding costs and efficiency savings; and customers and counterparties (including financial institutions) failing to perform their obligations to the Company. Other factors that could cause actual results to differ materially from those described in this presentation include fluctuations in exchange rates, interest rates and commodity price indices; restrictions and conditions (including filing requirements) in National Grid's borrowing and debt arrangements, funding costs and access to financing; regulatory requirements for the Company to maintain financial resources in certain parts of its business and restrictions on some subsidiaries' transactions such as paying dividends, lending or levying charges; the delayed timing of recoveries and payments in National Grid's regulated businesses and whether aspects of its activities are contestable; the funding requirements and performance of National Grid's pension schemes and other post-retirement benefit schemes; the failure to attract, develop and retain employees with the necessary competencies, including leadership and business capabilities, and any significant disputes arising with National Grid's employees or the breach of laws or regulations by its

employees; the failure to respond to market developments, including competition for onshore transmission, the threats and opportunities presented by emerging technology; the failure by the Company to respond to or meet its own commitments as a leader in relation to climate change development activities relating to energy transition, including the integration of distributed energy resources; and the need to grow the Company's business to deliver its strategy, as well as incorrect or unforeseen assumptions or conclusions (including unanticipated costs and liabilities) relating to business development activity. For further details regarding these and other assumptions, risks and uncertainties that may impact National Grid, please read the Strategic Report section and the 'Risk factors' on pages 227 to 230 of National Grid's most recent Annual Report and Accounts, as updated by National Grid's unaudited half-year financial information for the six months ended 30 September 2020, published on 12 November 2020. In addition, new factors emerge from time to time and National Grid cannot assess the potential impact of any such factor on its activities or the extent to which any factor, or combination of factors, may cause actual future results to differ materially from those contained in any forward-looking statement. Except as may be required by law or regulation, the Company undertakes no obligation to update any of its forward-looking statements, which speak only as of the date of this announcement.
