INDEPENDENT AUDITORS' REPORT

To the Board of Directors of
KeySpan Gas East Corporation

We have audited the accompanying financial statements of KeySpan Gas East Corporation d/b/a National Grid (the "Company"), which comprise the balance sheet and statement of capitalization as of March 31, 2018, and the related statements of income, cash flows and changes in shareholders' equity for the year then ended, and the related notes to the financial statements.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the Company's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of KeySpan Gas East Corporation d/b/a National Grid as of March 31, 2018, and the results of its operations and its cash flows for the year then ended in accordance with accounting principles generally accepted in the United States of America.

Predecessor Auditors' Opinion on 2017 and 2016 Financial Statements

The financial statements of the Company as of and for each of the two years ended March 31, 2017 were audited by other auditors whose report, dated August 18, 2017, expressed an unmodified opinion on those statements.

The accompanying notes are an integral part of these financial statements.

KEYSPAN GAS EAST CORPORATION
NOTES TO THE FINANCIAL STATEMENTS

1. NATURE OF OPERATIONS AND BASIS OF PRESENTATION

KeySpan Gas East Corporation d/b/a National Grid ("the Company") is a gas distribution company engaged in the transportation and sale of natural gas to approximately 598,000 customers in Nassau and Suffolk Counties in Long Island, New York and the Rockaway Peninsula in Queens, New York.

At March 31, 2018, the Company was a wholly-owned subsidiary of KeySpan Corporation ("KeySpan" or the "Parent"), which was a wholly-owned subsidiary of National Grid USA ("NGUSA"), a public utility holding company with regulated subsidiaries engaged in the generation of electricity and the transmission, distribution, and sale of both natural gas and electricity. NGUSA is a direct wholly-owned subsidiary of National Grid North America Inc. ("NGNA") and an indirect wholly-owned subsidiary of National Grid plc, a public limited company incorporated under the laws of England and Wales. Effective April 30, 2018 KeySpan merged into NGUSA and from that point forward the Company is a wholly-owned subsidiary of NGUSA. Since the merger occurred post fiscal year-end, the intercompany relationships between the Company and KeySpan were still in effect at March 31, 2018. As such, the disclosures in these financial statements and footnotes reflect those relationships that existed at March 31, 2018. NGUSA management is currently reviewing the relationships between KeySpan and all NGUSA subsidiaries and will make the appropriate adjustments to these relationships during the next fiscal year.

The accompanying financial statements are prepared in accordance with accounting principles generally accepted in the United States of America ("U.S. GAAP"), including the accounting principles for rate-regulated entities. The financial statements reflect the ratemaking practices of the applicable regulatory authorities.

The Company has evaluated subsequent events and transactions through September 19, 2018, the date of issuance of these financial statements, and concluded that there were no events or transactions that require adjustment to, or disclosure in, the financial statements as of and for the year ended March 31, 2018.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Use of Estimates

In preparing financial statements that conform to U.S. GAAP, the Company must make estimates and assumptions that affect the reported amounts of assets, liabilities, revenues, and expenses, and the disclosure of contingent assets and liabilities included in the financial statements. Actual results could differ from those estimates.

Regulatory Accounting

The New York Public Service Commission ("NYPSC") regulates the rates the Company charges its customers. In certain cases, the rate actions of the NYPSC can result in accounting that differs from non-regulated companies. In these cases, the Company defers costs (as regulatory assets) or recognizes obligations (as regulatory liabilities) if it is probable that such amounts will be recovered from, or refunded to, customers through future rates.

Revenue Recognition

Revenues are recognized for gas distribution services provided on a monthly billing cycle basis. The Company records unbilled revenues for the estimated amount of services rendered from the time meters were last read to the end of the accounting period.

With respect to base distribution rates, the NYPSC has approved a Revenue Decoupling Mechanism ("RDM"). Prior to January 1, 2017, the RDM applied only to the Company's firm residential heating sales and transportation customers. Under

the new rate plan (as discussed in Note 4, “Rate Matters” under “Rate Case Filing”) the RDM was expanded to include commercial and industrial customers. The RDM requires the Company to adjust its base rates annually to reflect the over or under recovery of the Company’s allowed revenues per customer from the prior year (May-April).

The Company’s tariff includes a cost of gas adjustment factor which requires an annual reconciliation of recoverable gas costs and revenues. Any difference is deferred pending recovery from, or refund to, customers.

The gas distribution business is influenced by seasonal weather conditions, and, therefore, the Company’s tariff contains a weather normalization adjustment that provides for recovery from, or refund to, firm customers of material shortfalls or excesses of firm delivery revenues (revenues less applicable gas costs and revenue taxes) during a heating season due to variations from normal weather.

Other Taxes

The Company collects taxes and fees from customers such as sales taxes, other taxes, surcharges, and fees that are levied by state or local governments on the sale or distribution of gas. The Company accounts for taxes that are imposed on customers (such as sales taxes) on a net basis (excluded from revenues), while taxes imposed on the Company, such as excise taxes, are recognized on a gross basis. Excise taxes collected and paid for the years ended March 31, 2018, 2017, and 2016 were $14.9 million, $3.4 million, and $18.9 million, respectively.

The state of New York imposes on corporations a franchise tax that is computed as the higher of a tax based on income or a tax based on capital. To the extent the Company’s state tax based on capital is in excess of the state tax based on income, the Company reports such excess in other taxes and taxes accrued in the accompanying financial statements.

Income Taxes

Federal and state income taxes have been computed utilizing the asset and liability approach that requires the recognition of deferred tax assets and liabilities for the tax consequences of temporary differences by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. Deferred income taxes also reflect the tax effect of net operating losses, capital losses, and general business credit carryforwards. The Company assesses the available positive and negative evidence to estimate whether sufficient future taxable income of the appropriate tax character will be generated to realize the benefits of existing deferred tax assets. When the evaluation of the evidence indicates that the Company will not be able to realize the benefits of existing deferred tax assets, a valuation allowance is recorded to reduce existing deferred tax assets to the net realizable amount.

The effects of tax positions are recognized in the financial statements when it is more likely than not that the position taken, or expected to be taken, in a tax return will be sustained upon examination by taxing authorities based on the technical merits of the position. The financial effect of changes in tax laws or rates is accounted for in the period of enactment. Deferred investment tax credits are amortized over the useful life of the underlying property.

NGNA files consolidated federal tax returns including all of the activities of its subsidiaries. Each subsidiary determines its tax provision based on the separate return method, modified by a benefits-for-loss allocation pursuant to a tax sharing agreement between NGNA and its subsidiaries. The benefit of consolidated tax losses and credits are allocated to the NGNA subsidiaries giving rise to such benefits in determining each subsidiary’s tax expense in the year that the loss or credit arises. In a year that a consolidated loss or credit carryforward is utilized, the tax benefit utilized in consolidation is paid proportionately to the subsidiaries that gave rise to the benefit regardless of whether that subsidiary would have utilized the benefit. The tax sharing agreement also requires NGNA to allocate its parent tax losses, excluding deductions from acquisition indebtedness, to each subsidiary in the consolidated federal tax return with taxable income. The allocation of NGNA’s parent tax losses to its subsidiaries is accounted for as a capital contribution and is performed in conjunction with the annual intercompany cash settlement process following the filing of the federal tax return.

Cash and Cash Equivalents

Cash equivalents consist of short-term, highly liquid investments with original maturities of three months or less. Cash and cash equivalents are carried at cost which approximates fair value.

Accounts Receivable and Allowance for Doubtful Accounts

The Company recognizes an allowance for doubtful accounts to record accounts receivable at estimated net realizable value. The allowance is determined based on a variety of factors including, for each type of receivable, applying an estimated reserve percentage to each aging category, taking into account historical collection and write-off experience, and management's assessment of collectability from individual customers, as appropriate. The collectability of receivables is continuously assessed and, if circumstances change, the allowance is adjusted accordingly. Receivable balances are written off against the allowance for doubtful accounts when the accounts are disconnected and/or terminated and the balances are deemed to be uncollectible.

Inventory

Inventory is composed of materials and supplies as well as gas in storage. Materials and supplies are stated at weighted average cost, which represents net realizable value, and are expensed or capitalized as used. The Company's policy is to write-off obsolete inventory; there were no material write-offs of obsolete inventory for the years ended March 31, 2018, 2017, or 2016.

Gas in storage is stated at weighted average cost and the related cost is recognized when delivered to customers. Existing rate orders allow the Company to pass directly through to customers the cost of gas purchased, along with any applicable authorized delivery surcharge adjustments. Gas costs passed through to customers are subject to regulatory approvals and are audited annually by the NYPSC.

The Company had materials and supplies of $4.7 million and $4.5 million and gas in storage of $16.1 million and $16.5 million at March 31, 2018 and 2017, respectively.

Derivative Instruments

The Company uses various derivative instruments to manage commodity price risk. All derivative instruments are recorded on the balance sheet at their fair value. All commodity costs, including the impact of derivative instruments, are passed on to customers through the Company's gas cost adjustment mechanism. Therefore, gains or losses on the settlement of these contracts are initially deferred and then refunded to, or collected from, customers consistent with regulatory requirements.

The Company's accounting policy is to not offset fair value amounts recognized for derivative instruments and related cash collateral receivable or payable with the same counterparty under a master netting agreement, but rather to record and present the fair value of the derivative instrument on a gross basis, with related cash collateral recorded within restricted cash and special deposits on the balance sheet.

Natural Gas Long-Term Arrangements

The Company enters into long-term gas contracts to procure commodity to serve its gas customers. Those contracts include Asset Management Agreements, Baseload, and Peaking gas contracts. The Company evaluates whether such agreements are derivative instruments or executory contracts. Natural gas arrangements that do not qualify as derivatives are accounted for as executory contracts and are therefore recognized as the gas is purchased.

Fair Value Measurements

The Company measures derivative instruments at fair value. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following is the fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities that a company has the ability to access as of the reporting date;
- Level 2: inputs other than quoted prices included within Level 1 that are directly observable for the asset or liability or indirectly observable through corroboration with observable market data;
- Level 3: unobservable inputs, such as internally-developed forward curves and pricing models for the asset or liability due to little or no market activity for the asset or liability with low correlation to observable market inputs; and
- Not categorized: certain investments are not categorized within the fair value hierarchy. These investments are measured based on the fair value of the underlying investments but may not be readily redeemable at that fair value.

The asset or liability's fair value measurement level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement. The Company uses valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs.

Property, Plant and Equipment

Property, plant and equipment is stated at original cost. The cost of repairs and maintenance is charged to expense and the cost of renewals and betterments that extend the useful life of property, plant and equipment is capitalized. The capitalized cost of additions to property, plant and equipment includes costs such as direct material, labor and benefits, and an allowance for funds used during construction ("AFUDC").

Depreciation is computed over the estimated useful life of the asset using the composite straight-line method. Depreciation studies are conducted periodically to update the composite rates and are approved by the NYPSC. The average composite rates for the years ended March 31, 2018, 2017, and 2016 were 1.8%, 1.8%, and 2.0%, respectively.

Depreciation expense includes a component for estimated future cost of removal, which is recovered through rates charged to customers. Any difference in cumulative costs recovered and costs incurred is recognized as a regulatory liability. When property, plant and equipment is retired, the original cost, less salvage, is charged to accumulated depreciation, and the related cost of removal is removed from the associated regulatory liability. The Company had cumulative costs recovered in excess of costs incurred of $17.4 million and $29.2 million at March 31, 2018 and 2017, respectively.

Allowance for Funds Used During Construction

The Company records AFUDC, which represents the debt and equity costs of financing the construction of new property, plant and equipment. AFUDC equity is reported in the accompanying statements of income as non-cash income in other (deductions) income, net and AFUDC debt is reported as a non-cash offset to other interest, including affiliate interest. After construction is completed, the Company is permitted to recover these costs through their inclusion in rate base and corresponding depreciation expense. The Company recorded AFUDC related to equity of $2.5 million, $2.0 million, and zero and AFUDC related to debt of $1.5 million, $1.0 million, and $0.4 million for the years ended March 31, 2018, 2017, and 2016, respectively. The average AFUDC rates for the years ended March 31, 2018, 2017, and 2016 were 5.9%, 4.8%, and 0.7%, respectively.

Impairment of Long-Lived Assets

The Company tests the impairment of long-lived assets annually or when events or changes in circumstances indicate that the carrying amount of the asset may not be recoverable. The recoverability of an asset is determined by comparing its carrying value to the future undiscounted cash flows that the asset is expected to generate. If the comparison indicates that the carrying value is not recoverable, an impairment loss is recognized for the excess of the carrying value over the estimated fair value. For the years ended March 31, 2018, 2017, and 2016, there were no impairment losses recognized for long-lived assets.

Goodwill

The Company tests goodwill for impairment annually on January 1, and when events occur or circumstances change that would more likely than not reduce the fair value of the Company below its carrying amount. The Company has early adopted ASU 2017-04, "Intangibles—Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment," which eliminates step two from the two-step goodwill impairment test. The one-step approach requires a recoverability test performed based on the comparison of the Company's estimated fair value with its carrying value, including goodwill. If the estimated fair value exceeds the carrying value, then goodwill is considered not impaired. If the carrying value exceeds the estimated fair value, the Company is required to recognize an impairment charge for such excess, limited to the allocated amount of goodwill.

The fair value of the Company was calculated in the annual goodwill impairment test for the year ended March 31, 2018 utilizing both income and market approaches. The Company used a 50% weighting for each valuation methodology, as it believes that each methodology provides equally valuable information. Based on the resulting fair value from the annual analyses, the Company determined that no adjustment of the goodwill carrying value was required at March 31, 2018 or 2017.

Asset Retirement Obligations

Asset retirement obligations are recognized for legal obligations associated with the retirement of property, plant and equipment, primarily associated with the Company's gas distribution facilities. Asset retirement obligations are recorded at fair value in the period in which the obligation is incurred, if the fair value can be reasonably estimated. In the period in which new asset retirement obligations, or changes to the timing or amount of existing retirement obligations are recorded, the associated asset retirement costs are capitalized as part of the carrying amount of the related long-lived asset. In each subsequent period the asset retirement obligation is accreted to its present value. The Company applies regulatory accounting guidance and both the depreciation and accretion costs associated with asset retirement obligation are recorded as increases to regulatory assets on the balance sheet. These regulatory assets represent timing differences between the recognition of costs in accordance with U.S. GAAP and costs recovered through the ratemaking process.

The following table represents the changes in the Company's asset retirement obligations:

	Years Ended March 31,	
	2018	2017
	(in thousands of dollars)	
Balance as of the beginning of the year	**$ 15,254**	$ 14,497
Accretion expense	**870**	853
Liabilities settled	**(140)**	(96)
Balance as of the end of the year	**$ 15,984**	$ 15,254

The Company had a current portion of asset retirement obligations of $0.9 million included in other current liabilities on the balance sheet at March 31, 2018.

Employee Benefits

The Company participates with other KeySpan subsidiaries in defined benefit pension plans and postretirement benefit other than pension ("PBOP") plans for its employees, administered by the Parent. The Company recognizes its portion of the pension and PBOP plans' funded status on the balance sheet as a net liability or asset. The cost of providing these plans is recovered through rates; therefore, the net funded status is offset by a regulatory asset or liability. The pension and PBOP plans' assets are commingled and allocated to measure and record pension and PBOP funded status at the year-end date. Pension and PBOP plan assets are measured at fair value, using the year-end market value of those assets.

Going Concern

Current U.S. GAAP guidance requires management to evaluate whether there is substantial doubt surrounding an entity's ability to continue as a going concern. If management concludes that substantial doubt exists additional disclosures relating to management's evaluation and conclusion are required. Management is not aware of any indicators giving rise to substantial doubt about the Company's ability to continue to operate and to meet its obligations as they become due.

New and Recent Accounting Guidance

Accounting Guidance Recently Adopted

Measurement of Inventory

In July 2015, the FASB issued ASU No. 2015-11, "Simplifying the Measurement of Inventory." The new guidance requires that inventory be measured at the lower of cost and net realizable value (other than inventory measured using "last-in, first out" and the "retail inventory method"). The application of this guidance did not have a material impact on the results of operations, cash flows, or financial position of the Company since the Company's inventory was stated at cost upon adoption and the cost represents the net realizable value. The adoption of the guidance did not change the Company's methodology of measuring inventory.

Employee Share-Based Payment Accounting

In March 2016, the FASB issued ASU No. 2016-09, "Improvements to Employee Share-Based Payment Accounting (Topic 718)," which simplifies several aspects of the accounting for share-based payment transactions, including the accounting for income taxes, forfeitures and statutory tax withholding requirements, as well as classification in the statement of cash flows. Most notably, entities are required to recognize all excess tax benefits and shortfalls as income tax expense or benefit in the income statement within the reporting period in which they occur. The application of this guidance did not have a material impact on the results of operations, cash flows, or financial position of the Company.

Goodwill

In January 2017, the FASB issued ASU No. 2017-04, which eliminates Step 2 from the goodwill impairment test. For the Company, the requirements of the new standard will be effective for the fiscal year ended March 31, 2022, with early adoption permitted. The Company early adopted the ASU in the year ended March 31, 2018 for its annual goodwill impairment testing. Based on the resulting fair value from the annual analyses, the Company determined that no adjustment to the goodwill carrying value was required at March 31, 2018 or 2017.

Derivatives and Hedging

In March 2016, the FASB issued ASU No. 2016-05, "Derivatives and Hedging (Topic 815): Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships." This update clarifies that a change in the counterparty to a derivative instrument that has been designated as a hedging instrument under Accounting Standards Codification ("ASC") 815, "Derivatives and Hedging," does not require dedesignation of that hedging relationship provided that all other hedge

accounting criteria in accordance with ASC 815-20-35 through ASC 815-35-18 continue to be met. The application of this guidance did not have a material impact on the results of operations, cash flows, or financial position of the Company.

Accounting Guidance Not Yet Adopted

Derivatives and Hedging

In August 2017, the FASB issued ASU No. 2017-12, “Targeted Improvements to Accounting for Hedging Activities,” which will be effective for the fiscal year ended March 31, 2020, with early adoption permitted. The amendments in this update expand and refine hedge accounting for both financial and nonfinancial risk components and align the recognition and presentation of the effects of the hedging instrument and the hedged item in the financial statements. This update also includes changes to certain targeted improvements to ease the application of current guidance related to the assessment of hedge effectiveness. The Company is currently evaluating the impact of the new guidance on the results of its operations, cash flows, and financial position.

Pension and Postretirement Benefits

In March 2017, the FASB issued ASU No. 2017-07, “Compensation Retirement Benefits (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Cost,” which changes certain presentation and disclosure requirements for employers that sponsor defined benefit pension and other postretirement benefit plans. The ASU requires the service cost component of the net benefit cost to be in the same line item as other compensation in operating income and the other components of net benefit cost to be presented outside of operating income on a retrospective basis. In addition, only the service cost component will be eligible for capitalization when applicable, on a prospective basis. For the Company, the requirements of the new standard will be effective for the fiscal year ended March 31, 2019, and interim periods within the reporting period, with early adoption permitted. The implementation of the ASU will not have a material impact on the net income of the Company since the Company defers the difference between actual pension costs and the amounts used to establish rates (See Note 8, “Employee Benefits” for additional details).

Statement of Cash Flows

In November 2016, the FASB issued ASU No. 2016-18, "Statement of Cash Flows (Topic 230): Restricted Cash (a consensus of the FASB Emerging Issues Task Force)," which requires entities to show the changes in the total of cash, cash equivalents, restricted cash, and restricted cash equivalents in the statement of cash flows.

In August 2016, the FASB issued ASU No. 2016-15, "Classification of Certain Cash Receipts and Cash Payments (Topic 230)," which provides guidance about the classification of certain cash receipts and payments within the statement of cash flows, including debt prepayment or extinguishment costs, contingent consideration payments made after a business combination, proceeds from the settlement of insurance claims and policies, and distributions received from equity method investments.

For the Company, the requirements of the new standards will be effective for the fiscal year ended March 31, 2019, and interim periods therein, with early adoption permitted. The application of this guidance is not expected to have a material impact on the results of operations, cash flows, or financial position of the Company.

Income Taxes

In October 2016, the FASB issued ASU No. 2016-16, "Income Taxes (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory," which eliminates the exception for all intra-entity sales of assets other than inventory. As a result, a reporting entity would recognize the tax expense from the sale of the asset in the seller's tax jurisdiction when the transfer occurs, even though the pre-tax effects of that transaction are eliminated in consolidation. For the Company, the requirements of the new standard will be effective for the fiscal year ended March 31, 2019, and interim periods thereafter, with early adoption permitted. The application of this guidance is not expected to have a material impact on the results of operations, cash flows, or financial position of the Company.

Financial Instruments – Credit Losses

In June 2016, the FASB issued ASU No. 2016-13, "Financial Instruments – Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." The amendment replaces the incurred loss impairment methodology in current U.S. GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. For the Company, the requirements of the new standard will be effective for the fiscal year ended March 31, 2022, and interim periods within, with early adoption permitted from the fiscal year ended March 31, 2020 and interim periods within. The Company is currently evaluating the impact of the new guidance on the presentation, results of its operations, cash flows, and financial position.

Revenue Recognition

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)." The underlying principle of this ASU is that an entity will recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration the entity expects to be entitled to, in exchange for those goods or services. For the Company, the new guidance is effective for the fiscal year ended March 31, 2019, including interim periods therein, and will be adopted using a modified retrospective approach.

The FASB has issued a number of additional recent ASUs related to revenue recognition, whose effective date and transition requirements are the same as those for ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)." In March 2016, the FASB issued ASU No. 2016-08, "Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)," which clarifies the implementation guidance on principal versus agent considerations. In April 2016, the FASB issued ASU No. 2016-10, "Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing," which provides guidance in the new revenue standard on identifying performance obligations and accounting for licenses of intellectual property. In May 2016, the FASB issued ASU No. 2016-12, "Revenue from Contracts with Customers (ASC 606) Narrow-Scope Improvements and Practical Expedients," providing additional clarity on various aspects of Topic 606, including a) Assessing the Collectability Criterion and Accounting for Contracts That Do Not Meet the Criteria for Step 1, b) Presentation of Sales Taxes and Other Similar Taxes Collected from Customers, c) Noncash Consideration, d) Contract Modifications at Transition, e) Completed Contracts at Transition, and f) Technical Correction. Lastly, in December 2016, the FASB issued ASU No. 2016-20, "Technical Corrections and Improvements to Topic 606, Revenue from Contracts with Customers." The amendments in this update cover a variety of corrections and improvements to the Codification related to the new revenue recognition standard (ASU No. 2014-09, "Revenue from Contracts with Customers (Topic 606)").

The Company has undertaken detailed reviews of its revenue arrangements and is in the process of finalizing its assessment of the impact of the new standard. Based on work to date, the Company does not believe that the standard will have a material impact on the presentation of the results of its operations, cash flows, or financial position. However, the Company will be required to make significant additional qualitative and quantitative financial statement disclosures under ASC 606, "Revenue from Contracts with Customers," pertaining to its revenue earning mechanisms.

Leases

In February 2016, the FASB issued a new lease accounting standard, ASU No. 2016-02, “Leases (Topic 842).” The key objective of the new standard is to increase transparency and comparability among organizations by recognizing lease assets and lease liabilities on the balance sheet and disclosing key information about leasing arrangements. Lessees will need to recognize a right-of-use asset and a lease liability for virtually all of their leases (other than leases that meet the definition of a short-term lease). For income statement purposes, a dual model has been retained, with leases to be designated as operating leases or finance leases. Expenses will be recognized on a straight-line basis for operating leases, and a front-loaded basis for finance leases. For the Company, the new standard is effective for the fiscal year ended March 31, 2020, and interim periods thereafter, with early adoption permitted. The new standard must be adopted using a modified retrospective transition, and provides for certain practical expedients. The Company is currently evaluating the impact of the new guidance on the results of its operations, cash flows, and financial position. The Company’s leases are discussed in Note 12, “Commitments and Contingencies” under “Operating Lease Obligations.”

Financial Instruments – Classification and Measurement

In January 2016, the FASB issued ASU No. 2016-01, “Financial Instruments – Overall: Recognition and Measurement of Financial Assets and Financial Liabilities.” The new guidance principally affects the accounting for equity investments and financial liabilities where the fair value option has been elected, as well as the disclosure requirements for financial instruments. For the Company, the new guidance is effective for the fiscal year ended March 31, 2019, and interim periods therein, with early adoption permitted for fiscal years or interim periods that have not yet been issued. The application of this guidance is not expected to have a material impact on the presentation, results of its operations, cash flows, and financial position.

Reclassifications

Certain reclassifications have been made to the prior year financial statements to conform the prior year’s data to the current year’s presentation. These reclassifications had no effect on the Company’s results of operations or cash flows.

3. REGULATORY ASSETS AND LIABILITIES

The Company records regulatory assets and liabilities that result from the ratemaking process. The following table presents the regulatory assets and regulatory liabilities recorded on the balance sheet:

	March 31,	
	2018	2017
	(in thousands of dollars)	
Regulatory assets		
Current:		
Derivative instruments	**$ 2,504**	$ 1,822
Gas costs adjustment	**7,098**	-
Rate adjustment mechanisms	**1,862**	2,564
Other	**4,045**	2,314
Total	**15,509**	6,700
Non-current:		
Environmental response costs	**179,338**	190,607
Postretirement benefits	**89,879**	108,585
Property taxes	**104,954**	97,553
Rate mitigation	**32,209**	32,209
Temperature control/interruptible sharing	**50,393**	49,420
Other	**31,448**	28,351
Total	**488,221**	506,725
Regulatory liabilities		
Current:		
Energy efficiency	**8,097**	3,717
Gas costs adjustment	**-**	10,817
Revenue decoupling mechanism	**74,822**	58,247
Other	**278**	435
Total	**83,197**	73,216
Non-current:		
Capital tracker	**26,460**	26,294
Carrying charges	**92,890**	83,966
Cost of removal	**17,362**	29,246
Delivery rate adjustment	**82,870**	82,870
Environmental response costs	**16,060**	6,441
Postretirement benefits	**80,732**	65,229
Property taxes	**28,984**	24,698
Regulatory tax liability, net	**379,928**	-
Other	**79,547**	58,652
Total	**804,833**	377,396
Net regulatory (liabilities) assets	**$ (384,300)**	$ 62,813

Capital tracker: The Company has various capital tracker mechanisms that reconcile the Company's capital expenditures to the amounts permitted in rates. Refer to Note 4, “Rate Matters” under “Rate Case Filing” for discussion of the Net Utility Plant and Depreciation Expense tracker and the City/State Construction (“CSC”) Reconciliation effective from January 1, 2017. The Company records a carrying charge on the net capital tracker deferral balance using the weighted average cost of capital.

Carrying charges: The Company records carrying charges on regulatory balances for which cash expenditures have been made and are subject to recovery, or for which cash has been collected and is subject to refund. Carrying charges are not recorded on items for which expenditures have not yet been made.

Cost of removal: Represents cumulative amounts collected, but not yet spent, to dispose of property, plant and equipment. This liability is discharged as removal costs are incurred.

Delivery rate adjustment: The NYPSC authorized a surcharge for recovery of regulatory assets ("Delivery Rate Surcharge") of $10 million beginning January 1, 2009, which increased incrementally by $10 million and aggregating to a maximum of approximately $100 million over the term of a previous rate agreement, which capped at $82.9 million. The timing for the disposition of any associated deferred balances will be determined by future NYPSC rulings.

Derivative instruments: The Company evaluates open derivative instruments for regulatory deferral by determining if they are probable of recovery from, or refund to, customers through future rates. Derivative instruments that qualify for recovery are recorded at fair value, with changes in fair value recorded as regulatory assets or regulatory liabilities in the period in which the change occurs.

Energy efficiency: Represents the difference between revenue billed to customers through the Company's energy efficiency charge and the costs of the Company's energy efficiency programs as approved by the NYPSC.

Environmental response costs: The regulatory asset represents deferred costs associated with the estimated costs to investigate and perform certain remediation activities at former manufactured gas plant ("MGP") sites and related facilities. The Company believes future costs, beyond the expiration of current rate plans, will continue to be recovered through rates. The regulatory liability represents the excess of amounts received in rates over the Company's actual site investigation and remediation ("SIR") costs.

Gas costs adjustment: The Company is subject to rate adjustment mechanisms for commodity costs, whereby an asset or liability is recognized resulting from differences between actual revenues and the underlying cost being recovered or differences between actual revenues and targeted amounts as approved by the NYPSC. These amounts will be refunded to, or recovered from, customers over the next year.

Postretirement benefits: Represents the excess costs of the Company's pension and PBOP plans over amounts received in rates that are to be recovered in future periods and the non-cash accrual of net actuarial gains and losses.

Property taxes: Effective January 1, 2017, this balance represents 85% of actual property and special franchise tax expenses above or below the rate allowance for future collection from, or payment to, the Company's customers.

Rate adjustment mechanisms: In addition to commodity costs, the Company is subject to a number of additional rate adjustment mechanisms whereby an asset or liability is recognized resulting from differences between actual revenues and the underlying cost being recovered or differences between actual revenues and targeted amounts as approved by the NYPSC.

Rate mitigation: Prior rate agreements provided for the establishment of a regulatory asset for the deferral of amortization adjustments, which were built up at a rate of $2 million per year with an offset to operations and maintenance expense. The NYPSC recognized a negotiated five year revenue increase settlement, aggregating $625.7 million. As part of the NGUSA and KeySpan merger ("Grid merger") settlement, these revenues were replaced with "rate mitigators." These rate mitigators include, but are not limited to, recovery of certain deferred costs, net synergy savings associated with the Grid merger, and a modified overall allowed rate of return. The timing for the disposition of any associated deferred balances will be determined by future NYPSC rulings.

Regulatory tax liability, net: Represents over-recovered federal and state deferred taxes of the Company primarily as a result of regulatory flow through accounting treatment and state income tax rate changes and excess federal deferred taxes as a result of the recently enacted Tax Cuts and Jobs Act ("Tax Act").

Revenue decoupling mechanism: As approved by the NYPSC, the Company has a RDM as described in Note 2, "Summary of Significant Accounting Policies" under "Revenue Recognition." The RDM allows for annual adjustment to the Company's delivery rates as a result of the reconciliation between allowed revenue per customer and actual revenue per customer. Any difference between the allowed revenue per customer and the actual revenue per customer is recorded as a regulatory asset or regulatory liability.

Temperature control/interruptible ("TC/IT") sharing: Under the existing rate agreement, effective from January 1, 2017, the revenue requirement reflects certain levels of imputed TC/IT margins. Differences between the actual margins and imputed margins are fully credited or surcharged to the ratepayers.

4. RATE MATTERS

Rate Case Filing

On January 29, 2016, the Company and Brooklyn Union Gas Company (the "New York Gas Companies") filed to adjust their base gas rates, to be effective from January 1, 2017. The filing requested to increase gas delivery base revenues.

On September 7, 2016, the New York Gas Companies filed a Joint Proposal establishing a three year rate plan beginning January 1, 2017 and ending December 31, 2019. The NYPSC issued an order approving the Joint Proposal on December 15, 2016 and the new rates went into effect beginning January 1, 2017.

The rate plan provided for a revenue increase of $112 million in the first year, an additional $19.6 million in the second year, and an additional $27 million in the third year, for a cumulative three year increase of $402 million. In an effort to mitigate the potential bill impacts that the revenue increases would have on customers in the first year, the revenue increases will be levelized over the three year rate period. As such, for U.S. GAAP reporting, revenues are recognized equal to the amounts actually billed to customers during each period rather than per the provisions of the rate plan. The settlement is based upon a 9% return on equity ("ROE") and 48% common equity ratio and includes an earning sharing mechanism in which customers will share earnings when the Company's ROE is in excess of 9.5%.

Key provisions of the settlement include funding for removal of a specific mileage of leak prone pipe ("LPP") in each rate year. Additionally, recovery of proactive LPP replacement costs incurred for repairs in excess of this mileage are permitted and recovered through the Gas Safety and Reliability Surcharge. This also includes a positive revenue adjustment mechanism for unit cost savings versus those specific in rates.

The Company has various capital tracker mechanisms that reconcile the Company's capital expenditures to the amounts permitted in rates. The Net Utility Plant and Depreciation Expense tracker is a downward only reconciliation that applies to the Companies' aggregate total average net plant and depreciation expense combined. The reconciliation is summed at the end of Rate Year Three (December 31, 2019) to determine whether any underspend is owed to customers. Under the City/State Construction Reconciliation, the Company is authorized to defer 90% of the revenue requirement impact difference (excluding operations and maintenance expense) between actual and forecast city/state construction costs for future recovery from or return to customers.

The Company's RDM was also adjusted to include revenue-per-class RDMs for industrial and commercial customers not previously subject to the RDM. The Company's SIR expense has also been moved from a surcharge to base rates.

Tax Cuts and Jobs Act

In response to the Tax Act signed into law on December 22, 2017, the NYPSC issued an Order Instituting Proceeding under Case 17-M-0815 - Proceeding on Motion of the Commission on Changes in Law that May Affect Rates. This proceeding was instituted to solicit comments on the Tax Act's implications and places the utilities on notice of the NYPSC's intent to protect ratepayers' interest and to ensure that any federal income taxes currently built into rates and accumulated deferred income taxes which, under the Tax Act, would result in excess collection are deferred for future ratepayer benefit. On March 29, 2018, the NYPSC Staff released its proposal to address accounting and ratemaking related to the Tax Act. Comments on NYPSC Staff's proposal were filed June 27, 2018.

On August 9, 2018, the NYPSC issued an order in its generic proceeding considering the impacts of federal tax reform. NYPSC Staff had advocated that all New York utilities implement a sur-credit by October 1st that would reflect the immediate effects of the Tax Act and also return any deferred benefits to customers. In response, the Company filed a proposal to (i) reduce the Company's rate prospectively to reflect the impact of the lower federal tax rate but delay any sur-credit to January 1st to offset scheduled rate increases and (ii) retain any deferred benefits, including accumulated deferred federal income taxes ("ADFIT"), for future rate moderation.

The NYPSC's order effectively approved all aspects of the Company's proposal. The NYPSC agreed that the Company should be allowed to defer both the pass back of calendar year 2018 tax savings and the amortization of excess ADFIT balances, and use the benefits as a rate moderator when base rates are next revised in 2020/2021. Specifically the NYPSC approved the Company's proposal to implement a sur-credit to reflect the lower tax rate effective January 1, 2019 to offset planned rate increases and retain the calendar year 2018 deferred amounts for future rate mitigation and/or to offset investments. Deferring the tax benefits until January 1, 2019 results in a deferred balance of $31 million. The Company estimates a protected excess ADFIT balance of $230 million and an unprotected excess ADFIT balance of $45 million.

Operations Audit

In August 2013, the NYPSC initiated an operational audit using a third party to review the accuracy of the customer service, electric reliability, and gas safety data reported by the investor owned utilities operating in New York, including the Company. On December 19, 2013, the NYPSC selected a third party to conduct the audit, which commenced in February 2014. On April 20, 2016, the NYPSC released the third party audit report publicly and adopted the majority of recommendations in the report. The audit report found that the Company, in general, is meeting its obligations to supply self-reported data. The report contains recommendations to improve internal controls and allow for greater consistency in reporting among the New York utilities. The recommendations do not affect current rate case performance targets or mechanisms and may be considered for potential implementation in future rate plans. The Company filed its plan to implement the audit recommendations with the NYPSC on May 19, 2016. On March 10, 2017, the NYPSC issued an Order approving the Company's implementation plan without modification, with quarterly updates to be made to the NYPSC on the status of implementation. On March 13, 2018, NYPSC Staff filed a letter indicating that the Company had implemented all recommendations and therefore the NYPSC was closing the audit.

Operations Staffing Audit

In January 2014, the NYPSC initiated an operational audit to review internal staffing levels and use of contractors for the core utility functions of the investor owned utilities operating in New York, including the Company. On June 26, 2014, the NYPSC selected a third party to conduct the audit. On February 21, 2017, the third party submitted its final report, which contained recommendations for all of National Grid's New York utilities designed to improve the staffing and workforce management processes. The report contained 26 recommendations for National Grid. The Company filed its implementation plan on March 23, 2017. On December 15, 2017, the NYPSC issued an Order approving the Company's implementation plan without modification, with quarterly updates to be made to the NYPSC on the status of implementation. The Company submitted its first update on April 16, 2018.

New York Management Audit

In 2018, the NYPSC will initiate a comprehensive management and operations audit of National Grid's three New York utilities. New York law requires periodic management audits of all utilities at least once every five years. National Grid last underwent a New York management audit in 2014/2015, when the NYPSC audited our New York gas business. The audit will be process oriented and forward looking, and presents opportunities to obtain feedback on how to improve service to customers and meet regulatory expectations. Areas of focus will likely include the traditional audit areas of corporate governance, budgeting and finance, customer, work management, and long-term planning, as well as organization design, information systems, and gas safety.

5. PROPERTY, PLANT AND EQUIPMENT

The following table summarizes property, plant and equipment at cost along with accumulated depreciation and amortization:

	March 31,	
	2018	2017
	(in thousands of dollars)	
Plant and machinery	**$ 3,901,511**	$ 3,622,679
Land and buildings	**72,394**	70,093
Assets in construction	**127,923**	115,581
Software and other intangibles	**51,995**	51,995
Total property, plant and equipment	**4,153,823**	3,860,348
Accumulated depreciation and amortization	**(845,379)**	(807,806)
Property, plant and equipment, net	**$ 3,308,444**	$ 3,052,542

6. DERIVATIVE INSTRUMENTS

The Company utilizes derivative instruments to manage commodity price risk associated with its natural gas purchases. The Company's commodity risk management strategy is to reduce fluctuations in firm gas sales prices to its customers.

The Company's financial exposures are monitored and managed as an integral part of the Company's overall financial risk management policy. The Company engages in risk management activities only in commodities and financial markets where it has an exposure, and only in terms and volumes consistent with its core business.

Volumes

Volumes of outstanding commodity derivative instruments measured in dekatherms ("dths") are as follows:

	March 31,	
	2018	2017
	(in thousands)	
Gas option contracts	**2,350**	3,100
Gas purchase contracts	**19,525**	23,336
Gas swap contracts	**7,185**	4,940
Total	**29,060**	31,376

Amounts Recognized on the Balance Sheet

	Asset Derivatives			Liability Derivatives	
	March 31,			March 31,	
	2018	**2017**		**2018**	2017
	(in thousands of dollars)			*(in thousands of dollars)*	
Current assets:			Current liabilities:		
Rate recoverable contracts:			Rate recoverable contracts:		
Gas option contracts	**$ -**	$ 35	Gas option contracts	**$ 283**	$ 102
Gas purchase contracts	**122**	1,076	Gas purchase contracts	**2,047**	2,001
Gas swap contracts	**68**	1,064	Gas swap contracts	**381**	-
	190	2,175		**2,711**	2,103
Other non-current assets:			Other non-current liabilities:		
Rate recoverable contracts:			Rate recoverable contracts:		
Gas purchase contracts	**17**	77	Gas purchase contracts	**-**	1,971
	17	77		**-**	1,971
Total	**$ 207**	$ 2,252	Total	**$ 2,711**	$ 4,074

The changes in fair value of the Company's rate recoverable contracts are offset by changes in regulatory assets and liabilities. As a result, the changes in fair value of those contracts had no impact in the accompanying statements of income. All of the Company's derivative instruments are subject to rate recovery as of March 31, 2018 and 2017.

Credit and Collateral

The Company is exposed to credit risk related to transactions entered into for commodity price risk management. Credit risk represents the risk of loss due to counterparty non-performance. Credit risk is managed by assessing each counterparty's credit profile and negotiating appropriate levels of collateral and credit support.

The credit policy for commodity transactions is managed and monitored by the Finance Committee to National Grid plc's Board of Directors ("Finance Committee"), which is responsible for approving risk management policies and objectives for risk assessment, control and valuation, and the monitoring and reporting of risk exposures. NGUSA's Energy Procurement Risk Management Committee ("EPRMC") is responsible for approving transaction strategies, annual supply plans, and counterparty credit approval, as well as all valuation and control procedures. The EPRMC is chaired by the Vice President of U.S. Treasury and reports to both the NGUSA Board of Directors and the Finance Committee.

The EPRMC monitors counterparty credit exposure and appropriate measures are taken to bring such exposures below the limits, including, without limitation, netting agreements, and limitations on the type and tenor of trades. The Company enters into enabling agreements that allow for payment netting with its counterparties, which reduce its exposure to counterparty risk by providing for the offset of amounts payable to the counterparty against amounts receivable from the counterparty. In instances where a counterparty's credit quality has declined, or credit exposure exceeds certain levels, the Company may limit its credit exposure by restricting new transactions with the counterparty, requiring additional collateral or credit support, and negotiating the early termination of certain agreements. Similarly, the Company may be required to post collateral to its counterparties.

The Company's credit exposure for all commodity derivative instruments, applicable payables and receivables, and instruments that are subject to master netting agreements, was a liability of $2.5 million and $1.8 million as of March 31, 2018 and 2017, respectively.

The aggregate fair value of the Company's commodity derivative instruments with credit-risk-related contingent features that were in a liability position at March 31, 2018 and 2017 was $0.6 million and $0.1 million, respectively. The Company

had no collateral posted for these instruments at March 31, 2018 and 2017. If the Company's credit rating were to be downgraded by one or two levels, it would not be required to post any additional collateral. If the Company's credit rating were to be downgraded by three levels, it would be required to post $0.6 million and $0.2 million additional collateral to its counterparties at March 31, 2018 and 2017, respectively.

Offsetting Information for Derivative Instruments Subject to Master Netting Arrangements

Total		-		3,972		102		4,074
Net (liabilities) assets	$	-	$	(2,854)	$	1,032	$	(1,822)

Derivative instruments*:* The Company's Level 2 fair value derivative instruments primarily consist of over-the-counter ("OTC") gas swap contracts and gas purchase contracts with pricing inputs obtained from the New York Mercantile Exchange and the Intercontinental Exchange ("ICE"), except in cases where the ICE publishes seasonal averages or where there were no transactions within the last seven days. The Company may utilize discounting based on quoted interest rate curves, including consideration of non-performance risk, and may include a liquidity reserve calculated based on bid/ask spread for the Company's Level 2 derivative instruments. Substantially all of these price curves are observable in the marketplace throughout at least 95% of the remaining contractual quantity, or they could be constructed from market observable curves with correlation coefficients of 95% or higher.

The Company's Level 3 fair value derivative instruments primarily consist of OTC gas option contracts and gas purchase contracts, which are valued based on internally-developed models. Industry-standard valuation techniques, such as the Black-Scholes pricing model, Monte Carlo simulation, and Financial Engineering Associates libraries are used for valuing such instruments. A derivative is designated Level 3 when it is valued based on a forward curve that is internally developed, extrapolated, or derived from market observable curves with correlation coefficients less than 95%, where optionality is present, or if non-economic assumptions are made.

Changes in Level 3 Derivative Instruments

	Years Ended March 31,			
	2018		2017	
	(in thousands of dollars)			
Balance as of the beginning of the year	**$**	**1,032**	$	2,520
Total gains included in regulatory assets and liabilities		**28,898**		5,732
Settlements		**(30,112)**		(7,220)
Balance as of the end of the year	**$**	**(182)**	$	1,032

A transfer into Level 3 represents existing assets or liabilities that were previously categorized at a higher level for which the inputs became unobservable during the year. A transfer out of Level 3 represents assets and liabilities that were previously classified as Level 3 for which the inputs became observable based on the criteria discussed previously for classification in Level 2. These transfers, which are recognized at the end of each period, result from changes in the observability of forward

curves from the beginning to the end of each reporting period. There were no transfers between Level 1 and Level 2, and no transfers into or out of Level 3, during the years ended March 31, 2018, 2017, or 2016.

For valuations that include both observable and unobservable inputs, if the unobservable input is determined to be significant to the overall inputs, the entire valuation is categorized in Level 3. This includes derivative instruments valued using indicative price quotations whose contract tenure extends into unobservable periods. In instances where observable data is unavailable, consideration is given to the assumptions that market participants would use in valuing the asset or liability. This includes assumptions about market risks such as liquidity, volatility, and contract duration. Such instruments are categorized in Level 3 as the model inputs generally are not observable. The Company considers non-performance risk and liquidity risk in the valuation of derivative instruments categorized in Level 2 and Level 3.

Quantitative Information About Level 3 Fair Value Measurements

The following tables provide information about the Company's Level 3 valuations:

Commodity	Level 3 Position	Fair Value as of March 31, 2018			Valuation Technique(s)	Significant Unobservable Input	Range
		Assets	(Liabilities)	Total			
		(in thousands of dollars)					
Gas	Cross commodity contracts	$ 101	$ -	$ 101	Discounted Cash Flow	Forward Curve (A)	$20.34 - $153.32/dth
Gas	Option contracts	-	(283)	(283)	Discounted Cash Flow	Implied Volatility	22% - 28%
	Total	$ 101	$ (283)	$ (182)			

(A) Includes deals with valuation assumptions on gas supply.

Commodity	Level 3 Position	Fair Value as of March 31, 2017			Valuation Technique(s)	Significant Unobservable Input	Range
		Assets	(Liabilities)	Total			
		(in thousands of dollars)					
Gas	Purchase contracts	$ 374	$ -	$ 374	Discounted Cash Flow	Forward Curve (A)	$1.67 - $3.29/dth
Gas	Cross commodity contracts	725	-	725	Discounted Cash Flow	Forward Curve	$23.32 - $136.00/dth
Gas	Option contracts	35	(102)	(67)	Discounted Cash Flow	Implied Volatility	33% - 39%
	Total	$ 1,134	$ (102)	$ 1,032			

(A) Includes deals with valuation assumptions on gas supply.

The significant unobservable inputs listed above would have a direct impact on the fair values of the Level 3 instruments if they were adjusted. The significant unobservable inputs used in the fair value measurement of the Company's gas purchase and gas option derivative instruments are forward commodity prices, implied volatility, and valuation assumptions pertaining to peaking gas deals based on forward gas curves. A relative change in commodity price at various locations underlying the open positions can result in significantly different fair value estimates.

Other Fair Value Measurements

The Company's balance sheet reflects long-term debt at amortized cost. The fair value of the Company's long-term debt was based on quoted market prices when available, or estimated using quoted market prices for similar debt. The fair value of this debt at March 31, 2018 and 2017 was $1.3 billion.

All other financial instruments on the balance sheet such as accounts receivable, accounts payable, and the intercompany money pool are stated at cost, which approximates fair value.

8. EMPLOYEE BENEFITS

The Company participates with other KeySpan subsidiaries in qualified and non-qualified non-contributory defined benefit plans (the "Pension Plans") and PBOP plans (together with the Pension Plan (the "Plans")), covering substantially all employees.

Plan assets are maintained for all of KeySpan and its subsidiaries in commingled trusts. In respect of cost determination, plan assets are allocated to the Company based on proportionate share of projected benefit obligation. The Plan's costs are first directly charged to the Company based on the Company's employees that participate in the Plan. Costs associated with affiliated service companies' employees are then allocated as part of the labor burden for work performed on the Company's behalf. The Company applies deferral accounting for pension and PBOP expenses associated with its regulated gas operations. Any differences between actual pension costs and amounts used to establish rates are deferred and collected from, or refunded to, customers in subsequent periods. Pension and PBOP expense are included within operations and maintenance expense in the accompanying statements of income. Portions of the net periodic benefit costs disclosed below have been capitalized as a component of property, plant and equipment.

Pension Plans

The Pension Plan is a defined benefit plan which provides union employees, as well as non-union employees hired before January 1, 2011, with a retirement benefit. Supplemental non-qualified, non-contributory executive retirement programs provide additional defined pension benefits for certain executives. During the years ended March 31, 2018, 2017, and 2016, the Company made contributions of approximately $13.5 million, $13.2 million, and $10.4 million, respectively, to the qualified pension plans. The Company expects to contribute approximately $33.6 million to the qualified pension plan during the year ending March 31, 2019.

Benefit payments to Pension Plan participants for the years ended March 31, 2018, 2017, and 2016 were approximately $19.3 million, $12.9 million, and $7.0 million, respectively.

PBOP Plans

The PBOP plan provides health care and life insurance coverage to eligible retired employees. Eligibility is based on age and length of service requirements and, in most cases, retirees must contribute to the cost of their coverage. During the years ended March 31, 2018, 2017, and 2016, the Company made contributions of approximately $10.4 million, $141.4 million, and $9.8 million, respectively, to the PBOP Plans. The Company does not expect to contribute to the PBOP Plans during the year ending March 31, 2019.

Benefit payments to PBOP plan participants for the years ended March 31, 2018, 2017, and 2016 were $6.0 million, $14.5 million, and $14.7 million, respectively.

Net Periodic Benefit Costs

The Company's net periodic benefit pension cost for the years ended March 31, 2018, 2017, and 2016 were $15.8 million, $17.8 million, and $16.9 million, respectively.

The Company's net periodic benefit PBOP cost for the years ended March 31, 2018, 2017, and 2016 were $0.6 million, $8.2 million, and $14.0 million, respectively.

Amounts Recognized in Regulatory Assets/Liabilities

The following tables summarize the Company's changes in actuarial gains/losses and prior service costs recognized in regulatory assets/liabilities for the years ended March 31, 2018, 2017, and 2016:

	Pension Plans		
	Years Ended March 31,		
	2018	2017	2016
	(in thousands of dollars)		
Net actuarial (gain) loss	**$ (126)**	$ (7,122)	$ 12,476
Amortization of net actuarial loss	**(12,289)**	(12,915)	(11,423)
Amortization of prior service cost, net	**(32)**	(32)	(53)
Total	**$ (12,447)**	$ (20,069)	$ 1,000
Included in regulatory assets	**(12,447)**	(20,069)	1,000
Total	**(12,447)**	(20,069)	1,000

	PBOP Plans		
	Years Ended March 31,		
	2018	2017	2016
	(in thousands of dollars)		
Net actuarial gain	**$ (8,428)**	$ (44,578)	$ (11,912)
Amortization of net actuarial gain (loss)	**566**	(3,538)	(4,911)
Amortization of prior service cost, net	**496**	515	520
Total	**$ (7,366)**	$ (47,601)	$ (16,303)
Included in regulatory liabilities	**(7,366)**	(47,601)	(16,303)
Total	**(7,366)**	(47,601)	(16,303)

Amounts Recognized in Regulatory Assets/Liabilities – not yet recognized as components of net actuarial loss

The following tables summarize the Company's amounts in regulatory assets/liabilities on the balance sheet that have not yet been recognized as components of net actuarial loss at March 31, 2018, 2017, and 2016:

	Pension Plans		
	Years Ended March 31,		
	2018	**2017**	**2016**
	(in thousands of dollars)		
Net actuarial loss	**$ 39,230**	$ 51,645	$ 71,682
Prior service cost	**369**	401	433
Total	**$ 39,599**	$ 52,046	$ 72,115
Included in regulatory assets	**39,599**	52,046	72,115
Total	**39,599**	52,046	72,115

	PBOP Plans		
	Years Ended March 31,		
	2018	**2017**	**2016**
	(in thousands of dollars)		
Net actuarial (gain) loss	**$ (22,920)**	$ (15,058)	$ 33,058
Prior service cost	**(957)**	(1,453)	(1,968)
Total	**$ (23,877)**	$ (16,511)	$ 31,090
Included in regulatory liabilities	**(23,877)**	(16,511)	31,090
Total	**(23,877)**	(16,511)	31,090

The amount of net actuarial loss and prior service cost to be amortized from regulatory assets during the year ending March 31, 2019 for the Pension Plans is $10.8 million and zero, respectively, and net actuarial loss and prior service benefit to be amortized from regulatory assets during the year ending March 31, 2019 for the PBOP Plans is ($1.0) million and ($0.5) million, respectively.

Amounts Recognized on the Balance Sheet

The following table summarizes the portion of the funded status above that is recognized on the Company's balance sheet at March 31, 2018 and 2017:

	Pension Plans		PBOP Plans	
	March 31,		March 31,	
	2018	2017	**2018**	2017
	(in thousands of dollars)			
Projected benefit obligation	**$ (376,487)**	$ (361,294)	**$ (259,197)**	$ (246,814)
Fair value of plan assets	**310,838**	285,544	**305,153**	275,135
Total	**$ (65,649)**	$ (75,750)	**$ 45,956**	$ 28,321
Other non-current assets	**$ -**	$ -	**$ 45,956**	$ -
Other non-current liabilities	**(65,649)**	(75,750)	**-**	28,321
Total	**$ (65,649)**	$ (75,750)	**$ 45,956**	$ 28,321

Expected Benefit Payments

Based on current assumptions, the following benefit payments are expected subsequent to March 31, 2018 in respect of the Company:

(in thousands of dollars) Years Ended March 31,	Pension Plans	PBOP Plans
2019	$ 19,904	$ 4,777
2020	20,490	5,022
2021	21,067	5,261
2022	21,549	5,524
2023	22,138	5,745
2024-2028	115,983	31,069
Total	$ 221,131	$ 57,398

Assumptions Used for Employee Benefits Accounting

	Pension Plans	
	Years Ended March 31,	
	2018	2017
Benefit Obligations:		
Discount rate	**4.10%**	4.30%
Rate of compensation increase	**3.50%**	3.50%
Expected return on plan assets	**6.25%**	6.50%
Net Periodic Benefit Costs:		
Discount rate	**4.30%**	4.25%
Rate of compensation increase	**3.50%**	3.50%
Expected return on plan assets	**6.50%**	6.50%

	PBOP Plans	
	Years Ended March 31,	
	2018	2017
Benefit Obligations:		
Discount rate	**4.10%**	4.30%
Rate of compensation increase	**n/a**	n/a
Expected return on plan assets	**6.25%-6.75%**	6.50%-6.75%
Net Periodic Benefit Costs:		
Discount rate	**4.30%**	4.25%
Rate of compensation increase	**n/a**	n/a
Expected return on plan assets	**6.50%-6.75%**	6.25%-6.75%

The Company selects its discount rate assumption based upon rates of return on highly rated corporate bond yields in the marketplace as of each measurement date. Specifically, the Company uses the Hewitt AA Above Median Curve along with the expected future cash flows from the Company retirement plans to determine the weighted average discount rate assumption.

The expected rate of return for various passive asset classes is based both on analysis of historical rates of return and forward looking analysis of risk premiums and yields. Current market conditions, such as inflation and interest rates, are evaluated in connection with the setting of the long-term assumptions. A small premium is added for active management of both equity and fixed income securities. The rates of return for each asset class are then weighted in accordance with the actual asset allocation, resulting in a long-term return on asset rate for each plan.

Assumed Health Cost Trend Rate

	March 31,	
	2018	2017
Health care cost trend rate assumed for next year		
Pre 65	**7.50%**	7.00%
Post 65	**5.75%**	6.00%
Prescription	**10.25%**	10.25%
Rate to which the cost trend is assumed to decline (ultimate)	**4.50%**	4.50%
Year that rate reaches ultimate trend		
Pre 65	**2028**	2025
Post 65	**2026**	2024
Prescription	**2027**	2025

Plan Assets

KeySpan, as the Plans' sponsor, manages the benefit plan investments to minimize the long-term cost of operating the Plans, with a reasonable level of risk. Risk tolerance is determined as a result of a periodic asset/liability study which analyzes the Plans' liabilities and funded status and results in the determination of the allocation of assets across equity and fixed income securities. Equity investments are broadly diversified across U.S. and non-U.S. stocks, as well as across growth, value, and small and large capitalization stocks. Likewise, the fixed income portfolio is broadly diversified across market segments. Small investments are also approved for private equity, real estate, and infrastructure with the objective of enhancing long-term returns while improving portfolio diversification. For the PBOP Plans, since the earnings on a portion of the assets are taxable, those investments are managed to maximize after tax returns consistent with the broad asset class parameters established by the asset allocation study. Investment risk and return are reviewed by NGUSA's investment committee on a quarterly basis.

The Pension Plan is a trusted non-contributory defined benefit plan covering all eligible represented employees of the Company and eligible non-represented employees of the participating National Grid companies. The PBOP Plans are both a contributory and non-contributory, trusteed, employee life insurance and medical benefit plan sponsored by KeySpan. Life insurance and medical benefits are provided for eligible retirees, dependents, and surviving spouses of KeySpan.

The target asset allocations for the benefit plans as of March 31, 2018 and 2017 are as follows:

	Pension Plans		Union PBOP Plans		Non-Union PBOP Plans	
	March 31,		March 31,		March 31,	
	2018	2017	**2018**	2017	**2018**	2017
U.S. equities	**20%**	20%	**34%**	34%	**45%**	45%
Global equities (including U.S.)	**7%**	7%	**12%**	12%	**0%**	0%

The methods used to fair value pension and PBOP assets are described below:

Cash and cash equivalents: Cash and cash equivalents that can be priced daily are classified as Level 1. Active reserve funds, reserve deposits, commercial paper, repurchase agreements, and commingled cash equivalents are classified as Level 2. Cash and cash equivalents invested in commingled money market investment funds which have net asset value ("NAV") pricing per fund share are excluded from the fair value hierarchy.

Accounts receivable and accounts payable: Accounts receivable and accounts payable are classified as Level 1. Such amounts are short-term and settle within a few days of the measurement date.

Equity and preferred securities: Common stocks, preferred stocks, and real estate investment trusts are valued using the official close of the primary market on which the individual securities are traded. Equity securities are primarily comprised of securities issued by public companies in domestic and foreign markets plus investments in commingled funds, which are valued on a daily basis. The Company can exchange shares of the publicly traded securities and the fair values are primarily sourced from the closing prices on stock exchanges where there is active trading, in which case they are classified as Level 1 investments. If there is less active trading, then the publicly traded securities would typically be priced using observable data, such as bid and ask prices, and these measurements are classified as Level 2 investments. Mutual funds with publicly quoted prices and active trading are classified as Level 1 investments. For investments in commingled funds that are not publicly traded and have ongoing subscription and redemption activity, the fair value of the investment is the NAV per fund share, derived from the underlying securities' quoted prices in active markets, and they are excluded from the fair value hierarchy. Investments in commingled funds with redemption restrictions and that use NAV are excluded from the fair value hierarchy.

Fixed income securities: Fixed income securities (which include corporate debt securities, municipal fixed income securities, U.S. Government and Government agency securities including government mortgage backed securities, index linked government bonds, and state and local bonds) convertible securities, and investments in securities lending collateral (which include repurchase agreements, asset backed securities, floating rate notes and time deposits) are valued with an institutional bid valuation. A bid valuation is an estimated price at which a dealer would pay for a security (typically in an institutional round lot). Oftentimes, these evaluations are based on proprietary models which pricing vendors establish for these purposes. In some cases there may be manual sources when primary vendors do not supply prices. Fixed income investments are primarily comprised of fixed income securities and fixed income commingled funds. The prices for direct investments in fixed income securities are generated on a daily basis. Prices generated from less active trading with wider bid ask prices are classified as Level 2 investments. Mutual funds with publicly quoted prices and active trading are classified as Level 1 investments. For commingled funds that are not publicly traded and have ongoing subscription and redemption activity, the fair value of the investment is the NAV per fund share and is excluded from the fair value hierarchy. Investments in commingled funds with redemption restrictions and that use NAV are excluded from the fair value hierarchy.

Private equity and real estate: Commingled equity funds, commingled special equity funds, limited partnerships, real estate, venture capital, and other investments are valued using evaluations (NAV per fund share) based on proprietary models, or based on the NAV. Investments in private equity and real estate funds are primarily invested in privately held real estate investment properties, trusts, and partnerships as well as equity and debt issued by public or private companies. The Company's interest in the fund or partnership is estimated based on the NAV. The Company's interest in these funds cannot be readily redeemed due to the inherent lack of liquidity and the primarily long-term nature of the underlying assets. Distribution is made through the liquidation of the underlying assets. The Company views these investments as part of a long-term investment strategy. These investments are valued by each investment manager based on the underlying assets. The funds utilize valuation techniques consistent with the market, income, and cost approaches to measure the fair value of certain real estate investments. The majority of the underlying assets are valued using significant unobservable inputs and often require significant management judgment or estimation based on the best available information. Market data includes observations of the trading multiples of public companies considered comparable to the private companies being valued. Investments in limited partnerships with redemption restrictions and that use NAV are excluded from the fair value hierarchy.

While management believes its valuation methodologies are appropriate and consistent with other market participants, the use of different methodologies or assumptions to determine the NAV as a practical expedient could result in a different fair value measurement at the reporting date.

Defined Contribution Plan

NGUSA has a defined contribution pension plan that covers substantially all employees. For the years ended March 31, 2018, 2017, and 2016, the Company recognized an expense in the accompanying statements of income of $2.2 million, $1.3 million, and $0.5 million, respectively, for matching contributions.

Other Benefits

At March 31, 2018 and 2017, the Company had accrued workers compensation, auto, and general insurance claims which have been incurred but not yet reported ("IBNR") of $9.1 million and $3.5 million, respectively. IBNR reserves have been established for claims and/or events that have transpired, but have not yet been reported to the Company for payment.

9. CAPITALIZATION

The aggregate maturities of long-term debt for the years subsequent to March 31, 2018 are as follows:

(in thousands of dollars)	
Years Ending March 31,	
2019	$ -
2020	-
2021	-
2022	-
2023	-
Thereafter	1,200,000
Total	$ 1,200,000

The Company's debt agreements and banking facilities contain covenants, including those relating to the periodic and timely provision of financial information by the issuing entity and financial covenants such as restrictions on the level of indebtedness. Failure to comply with these covenants, or to obtain waivers of those requirements, could in some cases trigger a right, at the lender's discretion, to require repayment of some of the Company's debt and may restrict the Company's ability to draw upon its facilities or access the capital markets. During the years ended March 31, 2018 and 2017, the Company was in compliance with all such covenants.

Debt Authorizations

On December 18, 2015 the NYPSC authorized the Company to issue up to $1.2 billion of long-term debt in one or more transactions through March 31, 2019. The Company can issue up to $500 million of the total authorization for optional refinancing of existing debt. On August 2, 2016 the Company issued $700 million of unsecured senior long-term debt at 2.74% with a maturity date of August 15, 2026.

Dividend Restrictions

Pursuant to the NYPSC's orders, the ability of the Company to pay dividends to KeySpan is conditioned upon maintenance of a utility capital structure with debt not exceeding 58% of total utility capitalization. At March 31, 2018 and 2017, the Company was in compliance with the utility capital structure required by the NYPSC. In accordance with the NYPSC order approving the acquisition of KeySpan, the Company is permitted to declare dividends in an amount not to exceed retained earnings accumulated since the date of acquisition plus unappropriated retained earnings, unappropriated undistributed earnings and accumulated other comprehensive income existing immediately prior to the date of acquisition.

Preferred Stock

In connection with the acquisition of KeySpan by NGUSA, the Company became subject to a requirement to issue a class of preferred stock, having one share (the "Golden Share"), subordinate to any existing preferred stock. The holder of the Golden Share would have voting rights that limit the Company's right to commence any voluntary bankruptcy, liquidation, receivership, or similar proceeding without the consent of the holder of the Golden Share. The NYPSC subsequently authorized the issuance of the Golden Share to a trustee, GSS Holdings, Inc. ("GSS"), who will hold the Golden Share subject to a Services and Indemnity Agreement requiring GSS to vote the Golden Share in the best interests of New York State ("NYS"). On July 8, 2011, the Company issued the Golden Share with a par value of $1.

10. INCOME TAXES

Components of Income Tax Expense

	Years Ended March 31,		
	2018	2017	2016
	(in thousands of dollars)		
Current tax expense (benefit):			
Federal	**$ 3,627**	$ (245)	$ (1,457)
State	**2,393**	(6,681)	8,445
Total current tax expense (benefit)	**6,020**	(6,926)	6,988
Deferred tax expense (benefit):			
Federal	**37,350**	40,489	34,965
State	**8,965**	8,798	199
Total deferred tax expense (benefit)	**46,315**	49,287	35,164
Total income tax expense	**$ 52,335**	$ 42,361	$ 42,152

Statutory Rate Reconciliation

The Company's effective tax rates for the years ended March 31, 2018, 2017, and 2016 are 36.5%, 35.6%, and 42.6%, respectively. The following table presents a reconciliation of income tax expense at the federal statutory tax rate of 31.55%, 35%, and 35% respectively, to the actual tax expense:

	Years Ended March 31,		
	2018	2017	2016
	(in thousands of dollars)		
Computed tax	**$ 45,202**	$ 41,702	$ 34,607
Change in computed taxes resulting from:			
Audit and related reserve movements	**-**	(5,325)	-
State income tax, net of federal benefit	**7,775**	6,701	5,767
Other items, net	**(642)**	(717)	1,778
Total changes	**7,133**	659	7,545
Total income tax expense	**$ 52,335**	$ 42,361	$ 42,152

The Company is included in the NGNA and subsidiaries consolidated federal income tax return and New York unitary state income tax return. The Company has joint and several liability for any potential assessments against the consolidated group.

On December 22, 2017, the Tax Act was signed into law. The Tax Act includes significant changes to various federal tax provisions applicable to the Company, including provisions specific to regulated public utilities. The most significant changes include the reduction in the corporate federal income tax rate from 35% to 21% effective January 1, 2018 and the limitation of the net operating loss deduction for net operating losses generated in tax years starting after December 31, 2017 to 80% of taxable income with an indefinite carryforward period. The Tax Act provisions related to regulated public utilities eliminate bonus depreciation for certain property acquired or placed in service after September 27, 2017 and extend the normalization requirements for ratemaking treatment of excess deferred taxes.

On August 3, 2018, the Internal Revenue Service and the U.S. Department of Treasury released proposed regulations associated with the expanded depreciation rules under Section 168(k) enacted as part of the Tax Act. The Company is

evaluating the potential impact of the proposed regulations and will include a potential adjustment to its financial statements in the next fiscal year when final regulations are issued.

In accordance with ASC 740, "Income Taxes," the effects of changes in tax law are required to be recognized in the period of enactment, which for the Company is the period ended March 31, 2018. Since the Company's fiscal year end is March 31, the statutory rate applicable for the Company's fiscal year ended March 31, 2018, is a blended tax rate of 31.55%. In subsequent periods, the federal income tax rate will be 21%. In addition, ASC 740 requires deferred income tax assets and liabilities to be measured at the enacted tax rate expected to apply when temporary differences are to be realized or settled. As a result, the Company remeasured its federal deferred income tax assets and liabilities using the newly enacted tax rate of 21%.

The Company recognized a decrease in its net deferred income tax liability in the amount of $275.8 million with $0.4 million of the remeasurement recorded to deferred income tax expense and $276.2 million recorded as a regulatory liability for the refund of excess deferred income taxes to the ratepayers.

On December 22, 2017, the Securities and Exchange Commission issued Staff Accounting Bulletin ("SAB") 118, which provides guidance on accounting for the effects of the Tax Act. The FASB staff subsequently issued guidance stating that private companies may apply SAB 118 to the financial statements. SAB 118 provides a measurement period that should not extend beyond one year from the Tax Act enactment date to complete the accounting under ASC 740. To the extent that a company's accounting for certain income tax effects of the Tax Act is incomplete, a company can determine a reasonable estimate for those effects and record a provisional estimate in the financial statements. If a company cannot determine a provisional amount, the company should continue to apply existing accounting guidance for income taxes based on provisions of the tax laws that were in effect immediately prior to the enactment of the Tax Act.

The Company has made a reasonable estimate for the measurement and accounting of the effects of the Tax Act which has been reflected in the March 31, 2018 financial statements based on management's interpretation of the Tax Act and information available. The items reflected as provisional amounts are related to accelerated depreciation for tax purposes of certain property placed in service after September 27, 2017, the allocation of excess deferred taxes between customers and shareholders, and certain property related temporary differences. The final impact may differ from the recorded amounts to the extent refinements are made as a result of changes in management's interpretations and assumptions, additional guidance or technical corrections that may be issued.

Deferred Tax Components

	March 31,	
	2018	2017
	(in thousands of dollars)	
Deferred tax assets:		
Environmental remediation costs	**$ 20,024**	$ 30,929
Future federal benefit on state taxes	**18,447**	38,417
Net operating losses	**53,737**	92,414
Postretirement benefits and other employee benefits	**9,358**	26,823
Regulatory liabilities - taxes	**111,470**	-
Regulatory liabilities - other	**95,485**	128,087
Other items	**30,225**	38,519
Total deferred tax assets	**338,746**	355,189
Deferred tax liabilities:		
Property related differences	**654,046**	926,623
Regulatory assets - environmental response costs	**45,754**	81,660
Regulatory assets - other	**53,542**	82,605
Other items	**18,367**	29,529
Total deferred tax liabilities	**771,709**	1,120,417
Deferred income tax liabilities, net	**$ 432,963**	$ 765,228

Net Operating Losses

The amounts and expiration dates of the Company's net operating losses carryforward as of March 31, 2018 are as follows:

	Carryforward Amount	Expiration Period
	(in thousands of dollars)	
Federal	$ 313,123	2029 - 2037
NYS	415,482	2035 - 2037

As a result of the accounting for uncertain tax positions, the amount of deferred tax assets reflected in the financial statements is less than the amount of the tax effect of the federal net operating loss carryforwards reflected on the income tax returns.

The Company recognizes interest related to unrecognized tax benefits in other interest, including affiliate interest and related penalties, if applicable, in other (deductions) income, net in the accompanying statements of income. As of March 31, 2018 and 2017, the Company has accrued for interest related to unrecognized tax benefits of $0.5 million. During the years ended March 31, 2018, 2017, and 2016, the Company recorded interest expense of zero, $1.0 million, and $0.2 million, respectively. No tax penalties were recognized during the years ended March 31, 2018 or 2017. During the year ended March 31, 2016 the Company recognized a tax penalty expense of $0.3 million.

It is reasonably possible that other events will occur during the next twelve months that would cause the total amount of unrecognized tax benefits to increase or decrease. However, the Company does not believe any such increases or decreases would be material to its results of operations, financial position, or cash flows.

The Company is included in NGNA and subsidiaries' administrative appeal with the Internal Revenue Service ("IRS") related to the environmental deductions, disputed in the examination cycles for the years ended August 24, 2007, March 31, 2008 and March 31, 2009. The Company is expecting to reach a settlement with the IRS in the next fiscal year. The Company does not believe that the outcome of the settlement will have a material impact to its results of operations, financial position, or cash flows. The IRS continues its examination of the next cycle which includes income tax returns for the years ended March 31, 2010 through March 31, 2012. The examination is not expected to conclude in the next fiscal year. The income tax returns for the years ended March 31, 2013 through March 31, 2018 remain subject to examination by the IRS.

The state of New York will commence the examination of the Company's NYS income tax returns for the years ended March 31, 2009 through March 31, 2012 in the next fiscal year. The years ended March 31, 2013 through March 31, 2018 remain subject to examination by the state of New York.

The following table indicates the earliest tax year subject to examination for each major jurisdiction:

Jurisdiction	Tax Year
Federal	March 31, 2010
New York	March 31, 2009

11. ENVIRONMENTAL MATTERS

The normal ongoing operations and historic activities of the Company are subject to various federal, state, and local environmental laws and regulations. Under federal and state Superfund laws, potential liability for the historic contamination of property may be imposed on responsible parties jointly and severally, without regard to fault, even if the activities were lawful when they occurred.

The Company has identified numerous MGP sites and related facilities, which were owned or operated by the Company or its predecessors. These former sites, some of which are no longer owned by the Company, have been identified to the NYPSC and the New York State Department of Environmental Conservation (“DEC”) for inclusion on appropriate site inventories. Administrative Orders on Consent (“ACO”) or Voluntary Cleanup Agreements have been executed with the DEC to address the investigation and remediation activities associated with certain sites. Expenditures incurred for the years ended March 31, 2018, 2017, and 2016 were $4.1 million, $10.5 million, and $10.3 million, respectively.

The Company estimated the remaining costs of environmental remediation activities were $68.2 million and $71.4 million at March 31, 2018 and 2017, respectively. The Company had a current portion of environmental remediation costs of $6.0 million included in other current liabilities on the balance sheet at March 31, 2018. These costs are expected to be incurred over approximately 33 years. However, remediation costs for each site may be materially higher than estimated, depending on changing technologies and regulatory standards, selected end use for each site, and actual environmental conditions encountered. The Company has recovered amounts from certain insurers and potentially responsible parties, and, where appropriate, the Company may seek additional recovery from other insurers and from other potentially responsible parties, but it is uncertain whether, and to what extent, such efforts will be successful.

By rate orders, the NYPSC has provided for the recovery of SIR costs. Accordingly, as of March 31, 2018 and 2017, the Company has recorded net environmental regulatory assets of $163.3 million and $184.2 million, respectively.

The Company believes that its ongoing operations, and its approach to addressing conditions at historic sites, are in substantial compliance with all applicable environmental laws. Where the Company has regulatory recovery, it believes that the obligations imposed on it because of the environmental laws will not have a material impact on its results of operations or financial position.

12. COMMITMENTS AND CONTINGENCIES

Purchase Commitments

The Company has entered into various contracts for gas delivery, storage, and supply services. Certain of these contracts require payment of annual demand charges, which are recoverable from customers. The Company is liable for these payments regardless of the level of service required from third parties.

The Company's commitments under these long-term contracts for the years subsequent to March 31, 2018 are summarized in the table below:

(in thousands of dollars) Years Ending March 31,		Gas Purchases
2019	$	287,915
2020		252,882
2021		242,174
2022		204,107
2023		178,779
Thereafter		470,825
Total	$	1,636,682

Legal Matters

Several lawsuits have been filed that allege damages resulting from contamination associated with the historic operations of a former MGP located in Bay Shore. The Company has been conducting a remediation at Bay Shore pursuant to an ACO with the New York State DEC. The Company intends to contest each of the lawsuits vigorously.

On July 16, 2018 the Company received a tax refund of $50.4 million from the Town of Hempstead to settle outstanding claims with respect to garbage tax levies for the tax years 1996 through 2012. At that time the Company established a regulatory liability for the benefit of customers, pending future disposition by the NYPSC.

In addition to the matters described above, the Company is subject to various legal proceedings arising out of the ordinary course of its business. The Company does not consider any of such proceedings to be material, individually or in the aggregate, to its business or likely to result in a material adverse effect on its results of operations, financial position, or cash flows.

13. RELATED PARTY TRANSACTIONS

Accounts Receivable from and Accounts Payable to Affiliates

NGUSA and its affiliates provide various services to the Company, including executive and administrative, customer services, financial (including accounting, auditing, risk management, tax, and treasury/finance), human resources, information technology, legal, and strategic planning, that are charged between the companies and charged to each company.

The Company records short-term receivables from, and payables to, certain of its affiliates in the ordinary course of business. The amounts receivable from, and payable to, its affiliates do not bear interest and are settled through the intercompany money pool. A summary of outstanding accounts receivable from affiliates and accounts payable to affiliates is as follows:

	Accounts Receivable from Affiliates		Accounts Payable to Affiliates	
	March 31,		March 31,	
	2018	2017	**2018**	2017
	(in thousands of dollars)			
The Brooklyn Union Gas Company	**$ 9,356**	$ 8,368	**$ -**	$ -
KeySpan Corporation	**877**	658	**6,833**	7,963
National Grid Electric Services, LLC	**205**	205	**4,052**	4,052
National Grid Engineering Services, LLC	**1,774**	1,861	**85**	77
NGUSA	**703**	703	**1,625**	2,048
NGUSA Service Company	**3,298**	3,411	**21,733**	23,124
Other	**71**	65	**112**	854
Total	**$ 16,284**	$ 15,271	**$ 34,440**	$ 38,118

Intercompany Money Pool

The settlement of the Company's various transactions with NGUSA and certain affiliates generally occurs via the intercompany money pool in which it participates. The Company is a participant in the Regulated Money Pool and can both borrow and invest funds. Borrowings from the Regulated Money Pool bear interest in accordance with the terms of the Regulated Money Pool Agreement. As the Company fully participates in the Regulated Money Pool rather than settling intercompany charges with cash, all changes in the intercompany money pool balance and accounts receivable from affiliates and accounts payable to affiliates balances are reflected as investing or financing activities in the accompanying statements of cash flows. In addition, for the purpose of presentation in the statements of cash flows, it is assumed all amounts settled through the intercompany money pool are constructive cash receipts and payments, and therefore are presented as such.

The Regulated Money Pool is funded by operating funds from participants. NGUSA has the ability to borrow up to $3 billion from National Grid plc for working capital needs including funding of the Regulated Money Pool, if necessary. The Company had short-term intercompany money pool borrowings and investments of $81.6 million and $17.6 million at March 31, 2018 and 2017, respectively. The average interest rates for the intercompany money pool were 1.6%, 1.1%, and 0.7% for the years ended March 31, 2018, 2017, and 2016, respectively.

Service Company Charges

The affiliated service companies of NGUSA provide certain services to the Company at their cost. The service company costs are generally allocated to associated companies through a tiered approach. First and foremost, costs are directly charged to the benefited company whenever practicable. Secondly, in cases where direct charging cannot be readily determined, costs are allocated using cost/causation principles linked to the relationship of that type of service, such as number of employees, number of customers/meters, capital expenditures, value of property owned, and total transmission and distribution expenditures. Lastly, all other costs are allocated based on a general allocator determined using a 3-point formula based on net margin, net property, plant and equipment, and operations and maintenance expense.

Charges from the service companies of NGUSA, including but not limited to non-power goods and services, to the Company for the years ended March 31, 2018, 2017, and 2016 were $308.8 million, $331.8 million, and $315.4 million, respectively.
