EuroLink

Proposed by
National Grid Ventures

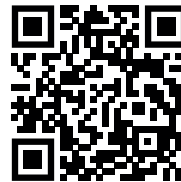

Non-Statutory Public Consultation
October – December 2022

To support the UK's growing energy needs, National Grid Ventures (NGV) is bringing forward proposals for a multi-purpose interconnector (MPI) called EuroLink, which will deliver a new electricity link between Great Britain and the Netherlands.

EuroLink could supply up to 1.8 gigawatts (GW) of electricity, which would be enough to power up to approximately 1.8 million homes, as well as contribute to our national energy security and support the UK's climate and energy goals.

We are holding a non-statutory public consultation to share our proposals for EuroLink and gather feedback, which will be used to help refine our plans, and respond to your questions.

Scan this QR code to see more information about National Grid, our proposals, including maps with the locations of the proposed infrastructure.

Key benefits

EuroLink will deliver a range of nationally strategic benefits, including:

Improving affordability of energy

Import cheaper energy for consumers by moving energy from where there is excess and the price is low to areas that need it and where prices are high.

Enhancing our national energy security

Deliver energy security by managing rapid changes in energy supply and demand.

Supporting zero carbon energy

Efficient links for zero carbon energy with 90% of electricity imported via National Grid interconnectors set to be from zero carbon sources by 2030.

See back page for event details and how to provide feedback.

Coordination

In response to stakeholder feedback, NGV and National Grid Electricity Transmission (NGET) are exploring:

- opportunities to coordinate NGV's projects, EuroLink and Nautilus, and NGET's project, Sea Link, including separately consulting on shared: converter station sites; cable route corridors; and landfalls
- opportunities with other developers to minimise the impact of construction on the environment and local communities
- offshore coordination with other developers as part of the Offshore Transmission Network Review

In exploring these opportunities to coordinate, NGV's EuroLink and NGET's Sea Link are consulting at the same time. We hope that by sharing our proposals, people feel better informed about how different parts of the infrastructure could fit together and can share their views on each of the projects accordingly.

We want to hear from you

The non-statutory consultation will commence on **Monday 24 October** and will run for eight weeks until **Sunday 18 December**.

Your feedback will help us refine our proposals and identify our preferred locations for onshore infrastructure.

There will be five in-person exhibition events (see details below) and a dedicated project website where you can find out more about our proposals and share your feedback online.

Location	Date	Time	Address
Leiston	Wednesday 23 November	10am – 4pm	Waterloo Centre, Waterloo Avenue, Leiston, IP16 4HE
Saxmundham	Thursday 24 November	2pm – 8pm	Saxmundham Market Hall, High St, Saxmundham IP17 1AF
Aldeburgh	Friday 25 November	10am – 4pm	St Peter and St Paul's Church Hall, Victoria Road, Aldeburgh, IP15 5DU
Reydon	Wednesday 30 November	10am – 4pm	Stella Peskett Hall, Might's Rd, Southwold IP18 6BE
Dunwich	Thursday 1 December	2pm – 8pm	Dunwich Museum, James Street, Saxmundham IP17 3DT

For residents who are unable to attend the in-person events, we will also be holding two webinars, where the project team will provide an overview of the proposals and answer questions. Dates and times for the webinars are provided below:

Webinar 1

Wednesday 9 November, 6:30pm – 8pm

Webinar 2

Wednesday 7 December, 10am – 11:30am

To register to attend the webinars and read more information about our proposals, please visit nationalgrid.com/eurolink

Keep in touch

You can provide feedback via our online feedback form, email or freepost until **Sunday 18 December**. If you have any questions please get in touch with our community relations team. All contact details are provided at the bottom of this page.

You can also request hard copies of all the project materials, including the feedback form and a freepost envelope, via the contact details below.
