An Introduction to ARIBA SLP & what it means for you

National Grid is implementing Ariba SLP solution, this will provide tools to onboard, qualify, segment and manage Suppliers.

With advanced tools to automate manual processes and support close collaboration with suppliers, Ariba SLP will help streamline our source-to-pay processes across our organisation.

UK Suppliers

You are our part of National Grids Critical Suppliers, ARIBA SLP will continue to build and maintain our strong working relationship's going forward.

National Grid is implementing ARIBA SLP

Coupa is not being replaced in the UK.

No Change to the following:

Purchase Requisitions will be raised through Coupa.

Purchase Orders will be delivered to you through Coupa.

Invoices do need to be submitted through Coupa Supplier Portal

Ariba SLP - will add automation to our approval process for new supplier onboarding or existing supplier company data changes.

Ariba SLP - gives you, as the supplier greater control of the management & maintenance of your company data.

Ariba SLP – you will need to be registered on Ariba SLP to be invited to any future Sourcing Events.

NO Cost to you for using ARIBA Standard Account

Key Benefits of ARIBA SLP

Note: The Primary contact person will receive all the status updates; you are able to designate other users within your organisation to this role.

ONE TRUTH

Centralised hub to store information, allowing you maintain your company, bank and tax details within our Ariba SLP platform

COLLABORATION

Single location for communication and collaboration between you and National Grid.

AUTOMATED

Automation of approvals for your Masterdata will speed up the process for onboarding new suppliers or any amendments to your Data

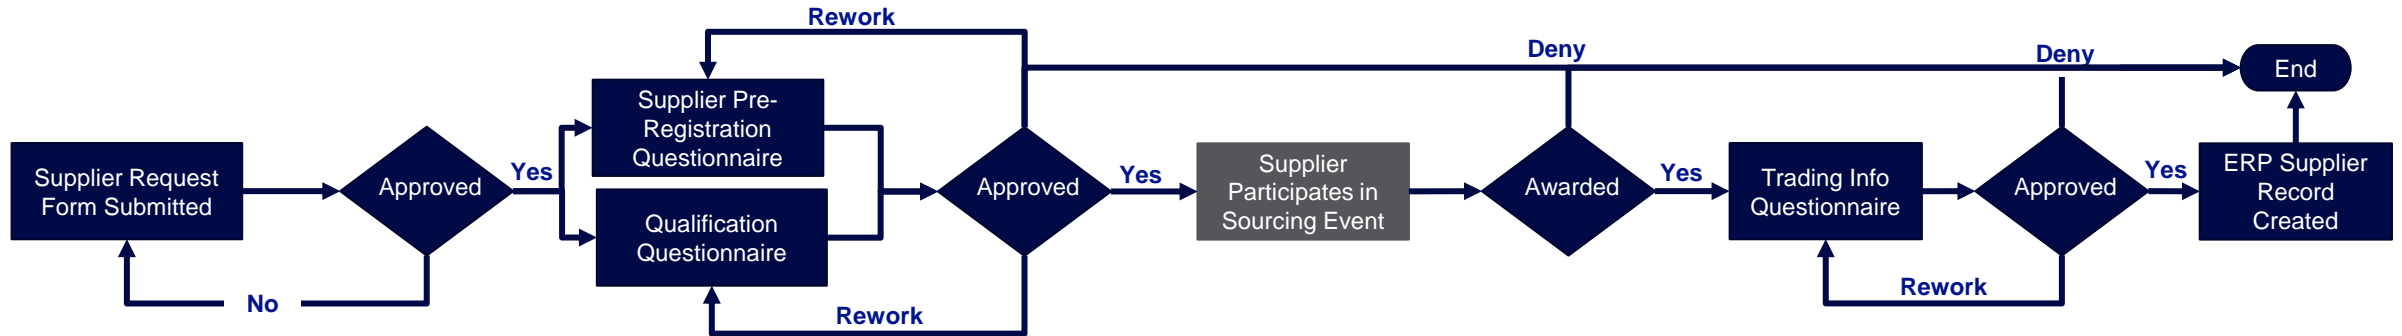

SECURE

Ariba SLP does not share suppliers' registration information between different companies.

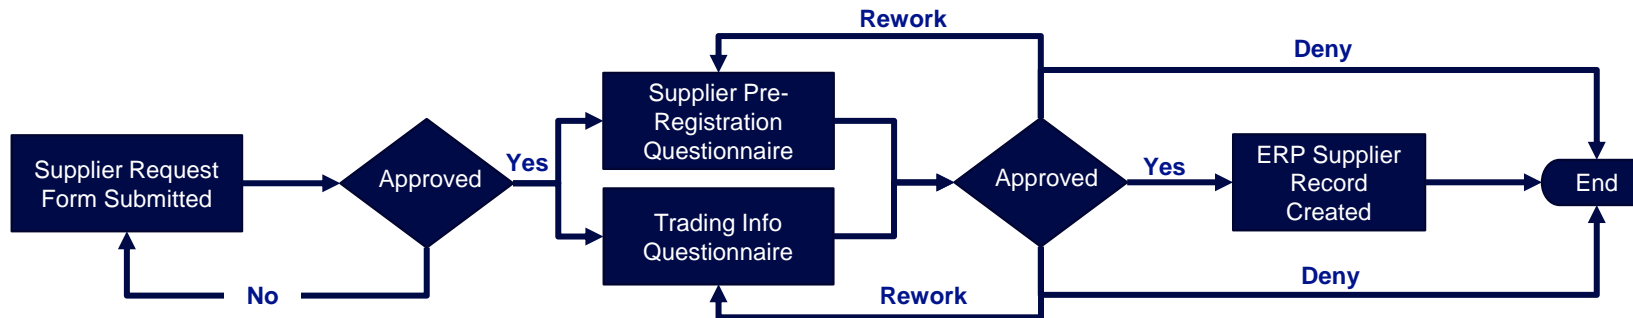

E2E Supplier Onboarding Processes

National Grid will operate end to end processes for supplier onboarding & registration.

- 1) **Sourcing Supplier Only** – this is the process that will be used when the initial request to onboard a supplier is driven by the need to register & qualify a potential supplier to participate in sourcing activities. The supplier will not be asked to provide any trading related information until they have been awarded work through the sourcing process.

- 2) **Purchase Order Only** – This is the process that should be followed when the initial request to onboard a supplier is driven by the need to transact with the supplier immediately and will not result in any formal sourcing related activities. This is primarily used for tactical and transactional purposes where NG plans only to issue purchase orders to supplier

Next Steps

Watch out for your Launch Communications

1. If you are not the Contact Person for your business to manage your Supplier onboarding to Ariba SLP, please advise the correct person we should contact via e-mail to AribaSupplierEnablement@nationalgrid.com
2. Request to join National Grid Ariba SLP will be sent to your contact person for supplier registration, for the forms to be completed and submitted.
 - **NOTE** All forms in ARIBA do have an expiration time, this is usually 5 working days. If your form expires, e-mail AribaSupplierEnablement@nationalgrid.com to request a new form to be sent.
3. We will send out the following after we have completed the webinars.
 - The Presentation
 - Supplier Information Pack and this includes FAQ's and example forms.
4. Watch out for further Communications for Go Live.

6

Questions & Answers

Ariba SLP, bringing National Grid and suppliers together to offer an improved onboarding experience

National Grid is implementing Ariba SLP and our Suppliers play an important role in making our Ariba SLP implementation a success.

All Suppliers will be required to register in Ariba SLP.

Thank you!
