

# Coleshill to Bedworth

Work in your area until Summer 2020

## Key

-  Spacers
-  Spacers have been removed

Overhead line refurbishment work between Hams Hall substation near Coleshill and Coventry substation near Bedworth. The pylon route passes through Hams Hall National Distribution Park in Lea Marston, Shustoke, Fillongley, Wood End, Bedworth West, Goodyers End and Exhall.

**Your electricity supply will not be affected by the work.**

### Keeping you informed

If you have any questions about the essential maintenance work taking place, please call our Community Relations team on **0800 073 1047**. The Community Relations team is available **seven days a week** between **7am - 7pm**. For more information visit <https://www.nationalgridet.com/coleshill-bedworth>

### What are we doing?

- Refurbishing the pylons, including replacing the insulators and fittings and the wires from pylon to pylon
- Painting the pylons

### What might you see and hear?

- Engineers working overhead
- Scaffolding and netting to protect the public
- Lane, footway or footpath closures to provide a working area for our activity.
- You may hear a noise coming from nearby pylons for a time – the wires could clash together whilst the spacers are removed in preparation for the work. This is not dangerous and the line's power supply is also switched off.
