Meet the team

Phoebe Adams, stakeholder engagement and communications manager, UK Power Networks

Andrew White, project manager, UK Power Networks

Tony Markwick, architect, Markwick Architects

Dan Knight, Camargue (UK Power Networks CR team)

Hetty Hopkinson, Camargue (UK Power Networks CR team)

Mark Farmer, project manager, National Grid

Joe Cawley, Grayling (National Grid CR team)

Housekeeping

- Everyone has the function to have videos on – please let us know if not.
- We kindly request you remain on mute until you speak or want to ask a question – this helps to minimise echoing on the call and prevents talking over each other.
- Please use the raise hand function to ask any questions.
- Feel free to use the chat function to make any general comments.
- If you would rather ask your question anonymously, feel free to email us on UKPNBengeworthRd@ukpowernetworks.co.uk.
- We will be recording the session for internal purposes only to ensure we capture all the feedback and your comments. We will send through a copy of the minutes post-event.

02

This meeting

What we want to cover today

1. Update from National Grid
2. UK Power Networks' new substation building – progressed designs
3. UK Power Networks' public engagement
4. Next steps and contact details
5. Your questions and AOB

03

National Grid update

National Grid update

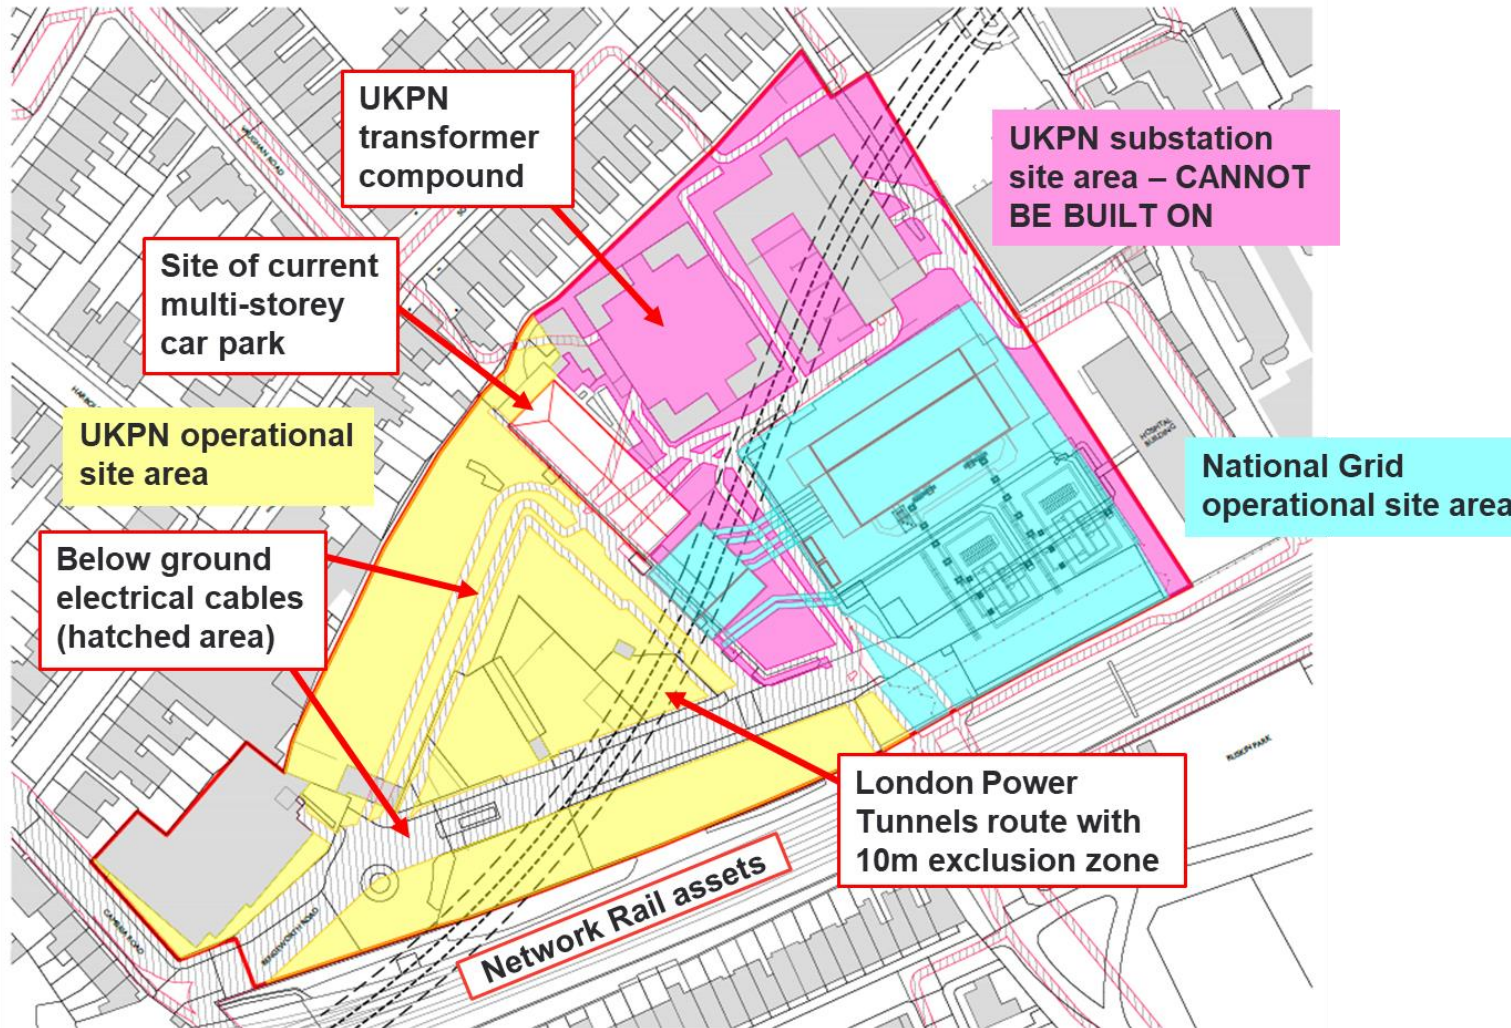

- We are continuing discussions about our substation.
- We are aiming to finalise the designs this month and will submit them to Lambeth Council for Prior Approval (*Prior Approval is a formal submission to your local planning authority and the purpose of it is to seek confirmation that specified parts of a development are acceptable, before work can commence.*)
- Once submitted to the Council, they will validate the application and then start their own consultation. We will share details about this in due course.
- The application should be determined within eight weeks, depending on any outstanding queries. We will work with the council to resolve these.
