

Proposals for Uxbridge Moor substation

Opportunity to have your say

National Grid is developing plans to build a new electricity substation ('Uxbridge Moor') on land bordering our existing substation in Iver. This is needed to connect several customers to our electricity network to the west of London.

Fulfilling our duty to provide power

The national electricity network has recently seen a significant increase in demand for electricity. In the Iver area a large number of organisations have requested new power connections from National Grid, and as a regulated business, we have a legal obligation to meet these requests. The Uxbridge Moor substation will help us do that.

Before we submit a planning application towards the end of 2023, we are inviting the local community to get involved through a public consultation. Your views will help shape our plans and the positive legacy we hope to leave for the community.

The public consultation on our proposals will run from 5 September to 6 October 2023

As part of the public consultation, we're holding two drop in events for the local community:

Where: **Jubilee Pavilion, Ivers Parish Council, 45b High Street, Iver, SL0 9ND**

When: **Thursday 14 Sept 2023, 1:30pm–6:30pm**

Where: **Iver Heath Village Hall, St. Margaret's Close, Iver, SL0 0DA**

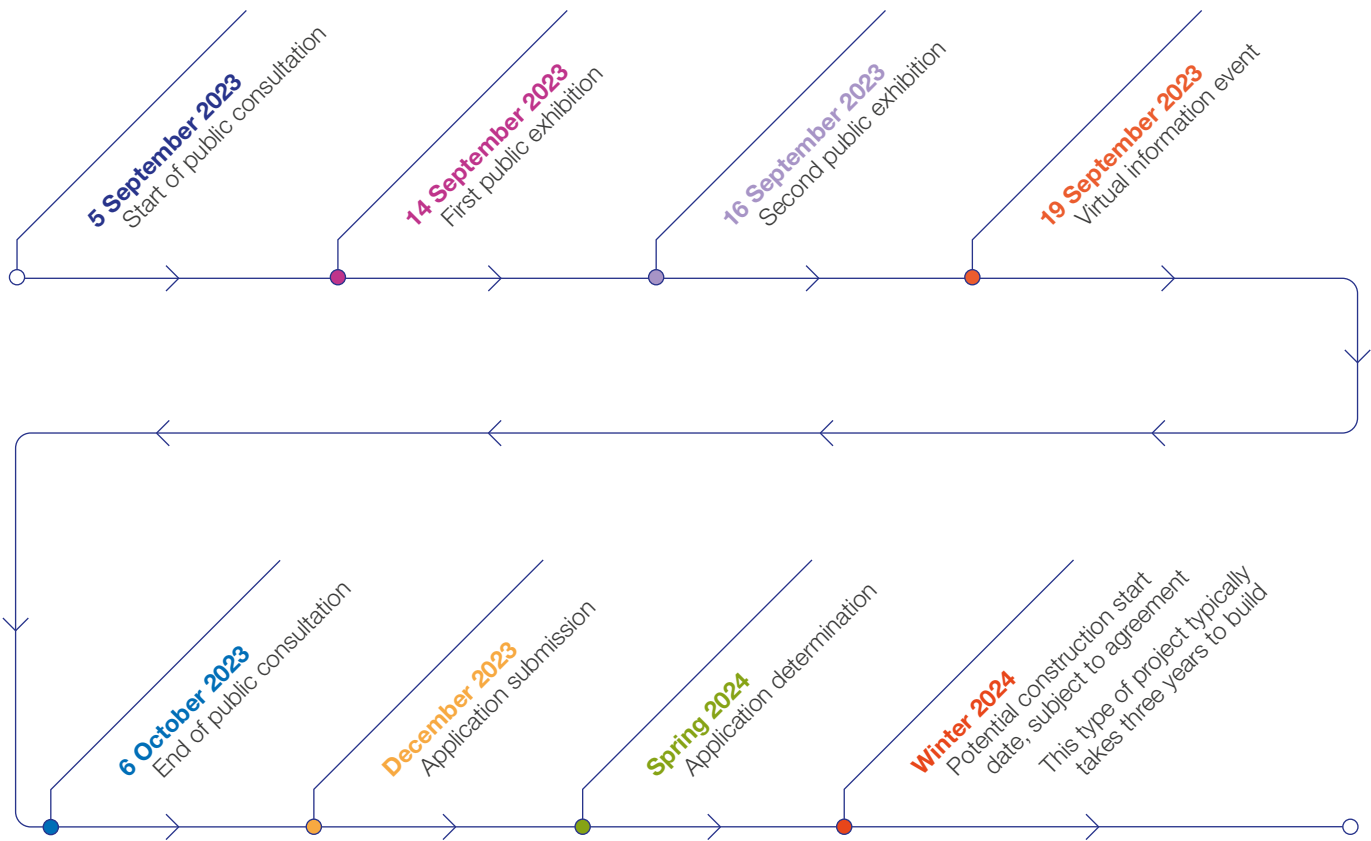

When: **Saturday 16 Sept 2023, 11:30am–4:30pm**

At these events, we will share details of our proposals and offer you a chance to provide feedback. Please drop in at any point and team members will be available to answer your questions.

Following the drop-in events, we will also be holding an online information event for those unable to make the in-person sessions. This will take place via Zoom on **19 September 2023, 5–6pm**. If you would like to register for this event, please email nationalgrid@uxbridgemoor.co.uk

Timeline

Leaving a positive legacy – how to get involved

We are aware of the effect our work and infrastructure can have on local people, and are committed to leaving a positive impact.

This is achieved through support for local community organisations, charities, schools and beyond. National Grid's nation-wide community grant programme, and project-specific grants, are offered where we work.

We want to hear from the community and work with you to see how we can support groups and initiatives across Iver.

To find out more about this project and how you can get involved in the public consultation, please visit nationalgrid.com/electricity-transmission/network-and-infrastructure/projects/uxbridge-moor-substation
