The Great Grid Upgrade

Grimsby to Walpole

Grimsby to Walpole

January 2024

National Grid Electricity Transmission is consulting on proposals to reinforce the high-voltage electricity transmission network to carry clean green energy between the North of England and the Midlands and between the Midlands and the South. Our proposals are part of The Great Grid Upgrade – the largest overhaul of the grid in generations to connect more renewable energy to homes and businesses.

Our first stage of consultation will run from **18 January** until **13 March 2024**.

It is important that we hear the views of local people. Knowing what matters to you, matters to us.

To find out more about our proposals, our public information events, online webinars, and how to provide feedback you can:
