

The Great Grid Upgrade

Grimsby to Walpole

Moving to Net Zero

The world we live in is changing, and the UK is at a turning point as we embrace the enormous opportunities a cleaner, greener future brings.

The UK has set a world-leading target to tackle climate change, which is to achieve net zero by 2050. Put simply, this means that we will remove the same amount of greenhouse gases from the atmosphere as we produce.

As a country, we are already making progress. But more needs to be done. A healthier, greener future for Britain requires significant upgrades to our energy infrastructure to deliver clean energy from where it is produced to where it is needed.

Grimsby to Walpole will help the transition to clean energy by making sure the grid is ready. Our proposals are part of The Great Grid Upgrade – the largest overhaul of the grid in generations.
