

The Great Grid Upgrade

Norwich to Tilbury

nationalgrid

Targeted consultation

Location reference: [Essex 12](#)

12 noon 25 February 2025 to 11:59 pm 27 March 2025

Norwich to Tilbury is a proposal for a new electricity transmission connection. It will play an important part in connecting low carbon, more affordable electricity from where it is generated to where it is needed.

From 10 April to 26 July 2024, we held a statutory consultation, inviting local communities, land owners and stakeholders to share their views on our proposals.

Since then, we have been carefully reviewing all the feedback we received as well as considering the findings of ongoing assessment work.

This has identified some places where there is potential to make a change to the proposals we published at our statutory consultation. These potential changes do not

materially change the effects or fundamentally change the project as a whole.

We intend to submit our application for development consent in summer 2025. Before we make any decisions, we want to give nearby residents and local communities the opportunity to provide feedback on proposed changes near to them.

We are consulting on the proposed changes described below and overleaf between 25 February and 27 March 2025 and we welcome your feedback.

What we are proposing to change in your area and why

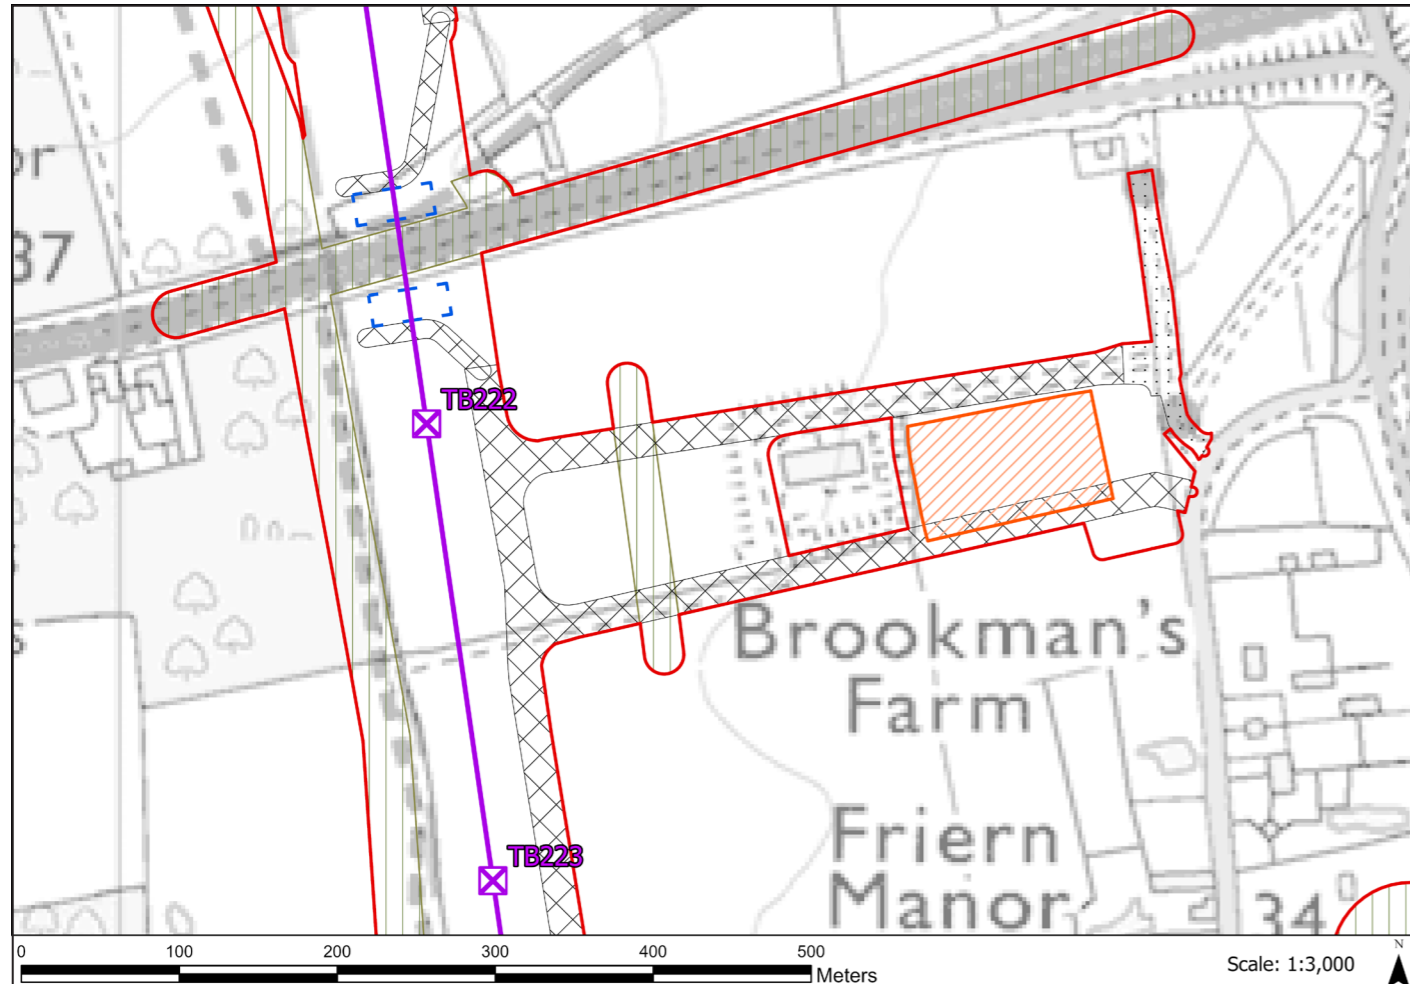

We are proposing to reposition the temporary construction access and laydown area location near Dunton Wayletts to the south of its location presented at statutory consultation in summer 2024. You can see both the design presented at our statutory consultation in summer 2024 and our currently proposed change on the maps overleaf. The proposed change would affect access to pylons TB225 and TB226 (previously presented at statutory consultation in summer 2024 as TB222 and TB223).

This change is being proposed following feedback which asked us to consider that future built development could be in the construction stage at the same time as the project and could therefore conflict with the proposed temporary access and compound arrangements presented at our statutory consultation in summer 2024.

The proposed change involves relocating the construction access road to TB226 (previously TB223), annotated on the map overleaf, and a new construction laydown area for this pylon. The proposed laydown area would be temporary, and the land would be returned to its original use after construction.

As there is some uncertainty over the timing of the built development, we propose to include both access arrangements. Our preferred access route remains the northern access at TB225 presented at the 2024 statutory consultation. This proposed access arrangement would be used in the event that the land used for the northern access at TB225 is being developed and cannot be used.

Alignment presented at the 2024 statutory consultation

Key

Proposed land use

- Draft order limits
- Statutory undertaker works

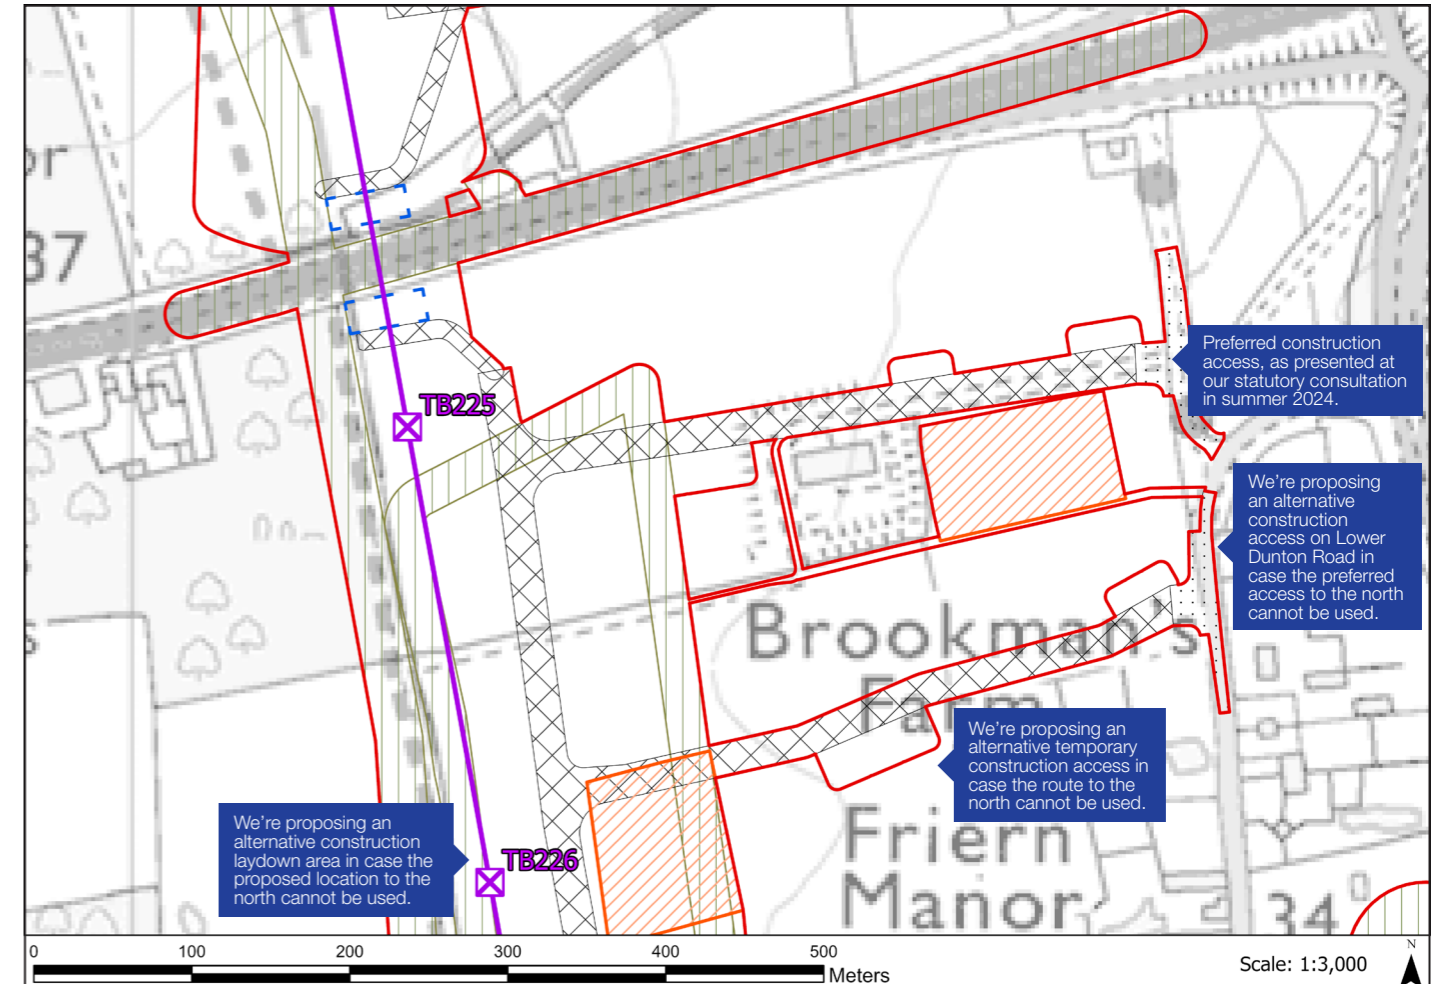

Proposed project design details

- ⊠ New lattice pylon
- New overhead line

Temporary works

- Site access, crossover points and visibility splays
- Haul roads
- Crossing protection work area
- Construction laydown area

Area of proposed change February 2025

What are the environmental implications of the proposed changes?

The proposed changes would not materially change the conclusions that were reported within the Preliminary Environmental Information Report (PEIR) published as part of our summer 2024 consultation.

For more information on environmental effects, please see the Environmental Implications of Change document (EIC) with location reference **Essex 12**, where information on the environmental implications of the proposed change is provided and can be read alongside the information contained here.

If you received this leaflet in the post, the EIC will be enclosed. Alternatively, you can view the EIC on our website at nationalgrid.com/norwich-to-tilbury.

If, following careful consideration of any feedback we receive, we decide to make this change, baseline information, environmental surveys and assessments associated with this change will be provided in the Environmental Statement (ES) that will form part of our application for a Development Consent Order (DCO).

Have your say

Our targeted consultation on the proposed changes at this location runs from **12 noon 25 February 2025 to 27 March 2025**.

If you have any comments regarding this proposed change, you can provide feedback by using the location reference **Essex 12**.

Feedback can be provided by:

Completing an online feedback questionnaire:
nationalgrid.com/norwich-to-tilbury

Filling out a paper feedback questionnaire and sending it to the Freepost address below – if you haven't been sent one, please call us on: **0800 915 2497** and we will post one to you

Sending us an email:
contact@n-t.nationalgrid.com

Writing to us (no stamp required) at:
FREEPOST N TO T

Attend a webinar

To give people an opportunity to ask the project team questions, we are holding three webinars via Microsoft Teams.

The webinars which will cover this change will be held on **17 March 2025 at 6:00 pm** and **18 March 2025 at 12 noon**.

You can sign up for a webinar on our website:
nationalgrid.com/norwich-to-tilbury

- Essex – 17 March 2025 at 6:00 pm
- Essex and Thurrock – 18 March 2025 at 12 noon
- Thurrock – 18 March 2025 at 6:00 pm

You can also call us on: **0800 915 2497** if you have any questions.

Visit our website

nationalgrid.com/norwich-to-tilbury where you will find maps, consultation materials, and our online feedback questionnaire.

The deadline for feedback is 11:59 pm on 27 March 2025.
