

The Great Grid Upgrade

Norwich to Tilbury

nationalgrid

Targeted consultation

Location reference: [Thurrock 2](#) 12 noon 25 February 2025 to 11:59 pm 27 March 2025

Norwich to Tilbury is a proposal for a new electricity transmission connection. It will play an important part in connecting low carbon, more affordable electricity from where it is generated to where it is needed.

From 10 April to 26 July 2024, we held a statutory consultation, inviting local communities, land owners and stakeholders to share their views on our proposals.

Since then, we have been carefully reviewing all the feedback we received as well as considering the findings of ongoing assessment work.

This has identified some places where there is potential to make a change to the proposals we published at our statutory consultation. These potential changes do not

materially change the effects or fundamentally change the project as a whole.

We intend to submit our application for development consent in summer 2025. Before we make any decisions, we want to give nearby residents and local communities the opportunity to provide feedback on proposed changes near to them.

We are consulting on the proposed changes described below and overleaf between 25 February and 27 March 2025 and we welcome your feedback.

What we are proposing to change in your area and why

We are proposing to reposition the alignment of the overhead line to allow the close paralleling of the existing 132 kV overhead line near Langdon Hills Golf Club. The proposed change involves the relocation of pylons TB238 to TB244 (previously presented at statutory consultation as TB235 to TB243) to more closely follow the route of the 132 kV overhead line.

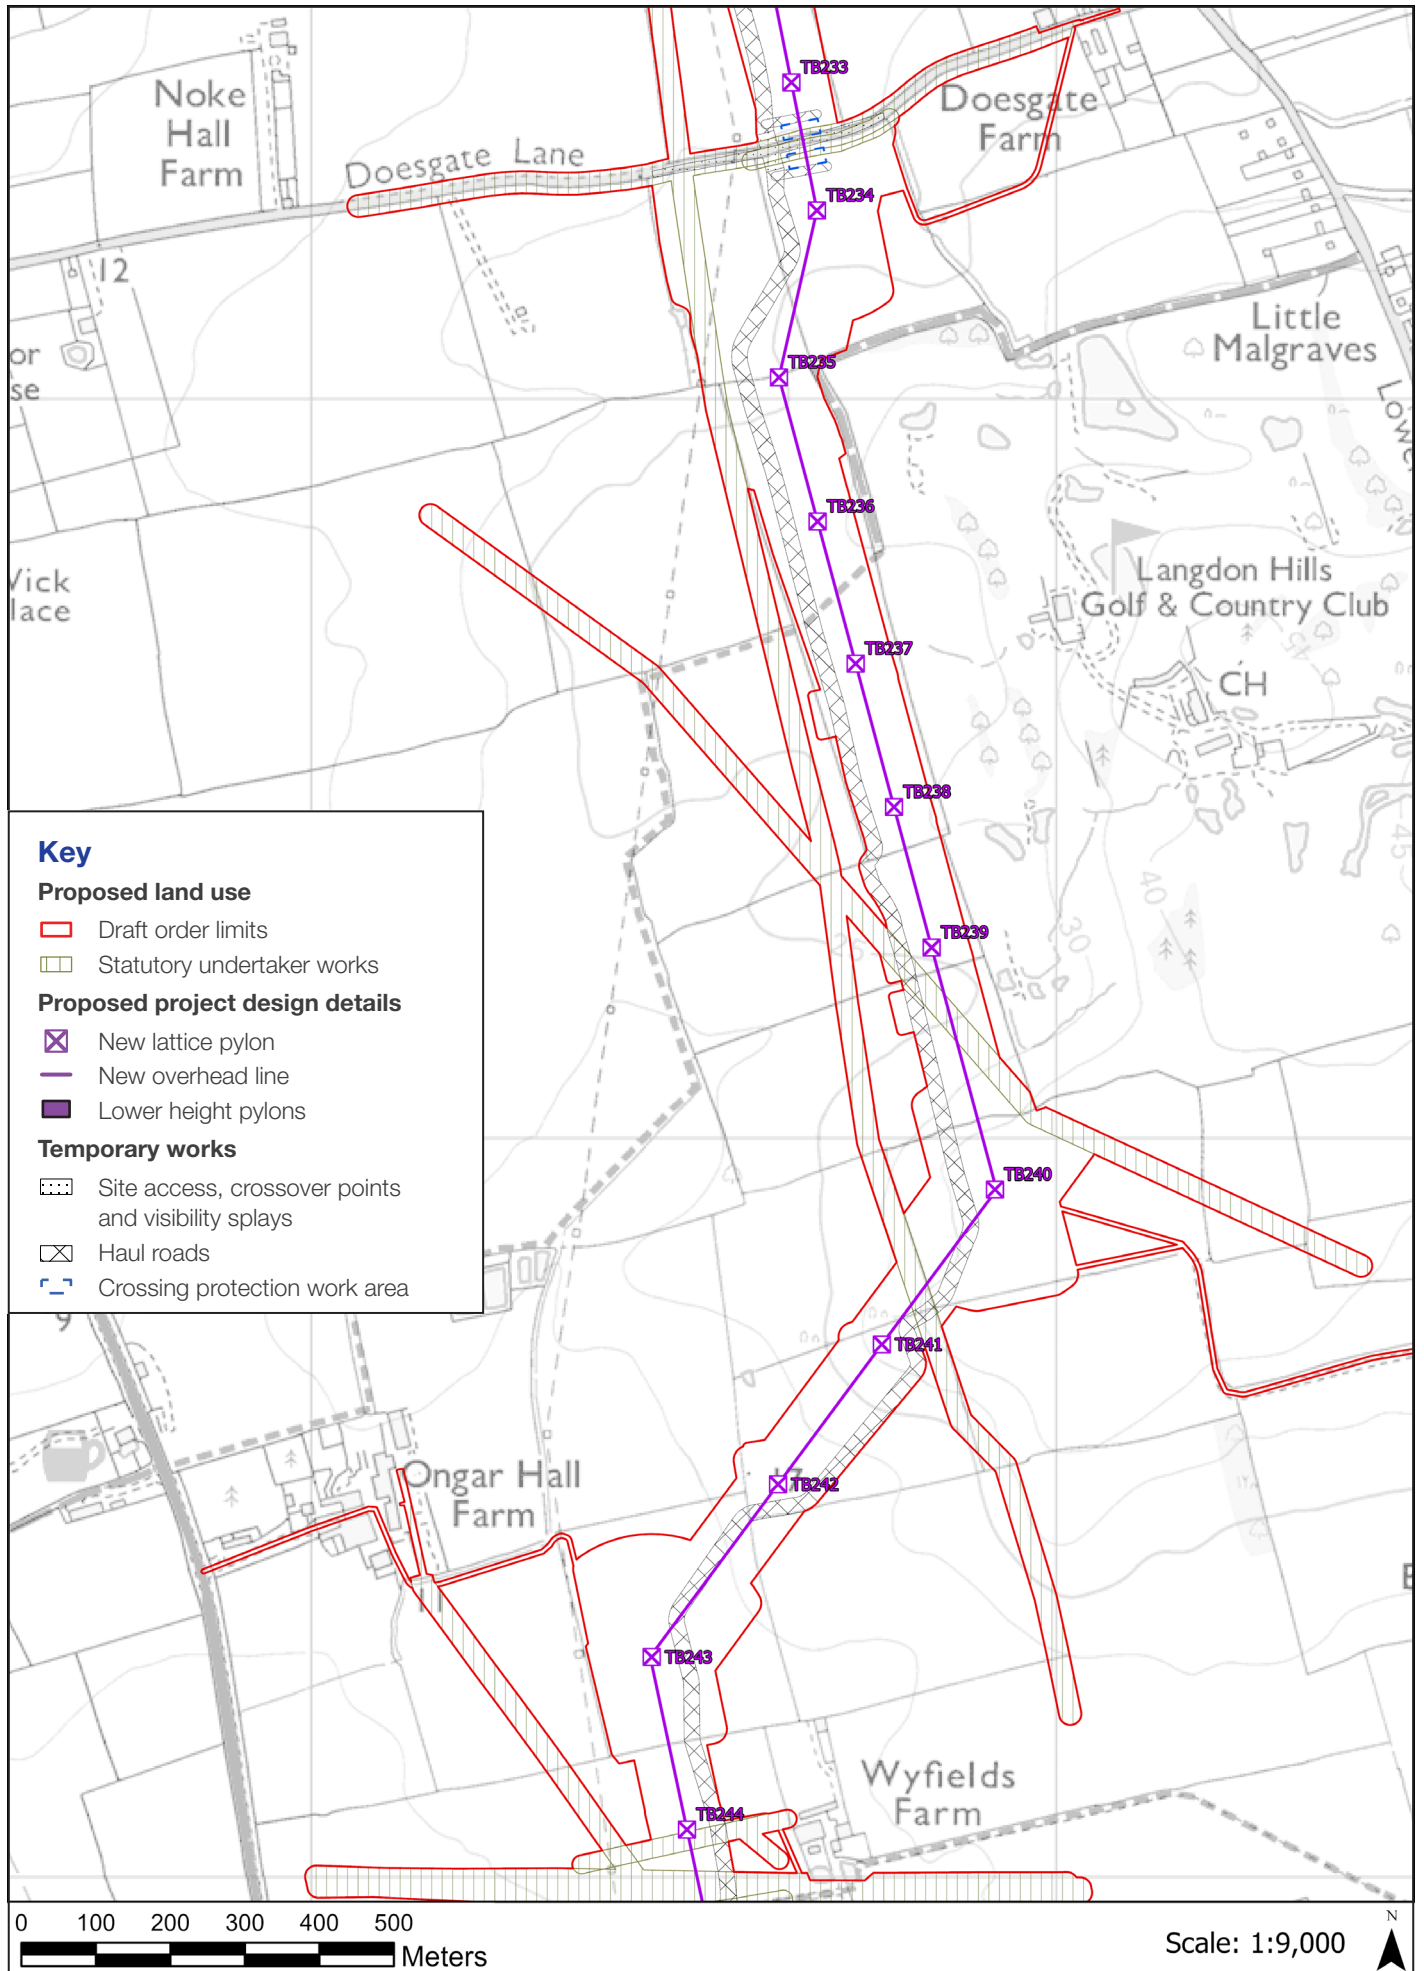

We are also proposing to use lower height lattice pylons from TB238 to TB243 (previously presented at statutory consultation as TB235 to TB242) to reduce the impacts on Thurrock Airfield. You can see the proposals presented at our statutory consultation in summer 2024 and our proposed changes on the maps overleaf.

This is in response to feedback from consultation which asked us to consider:

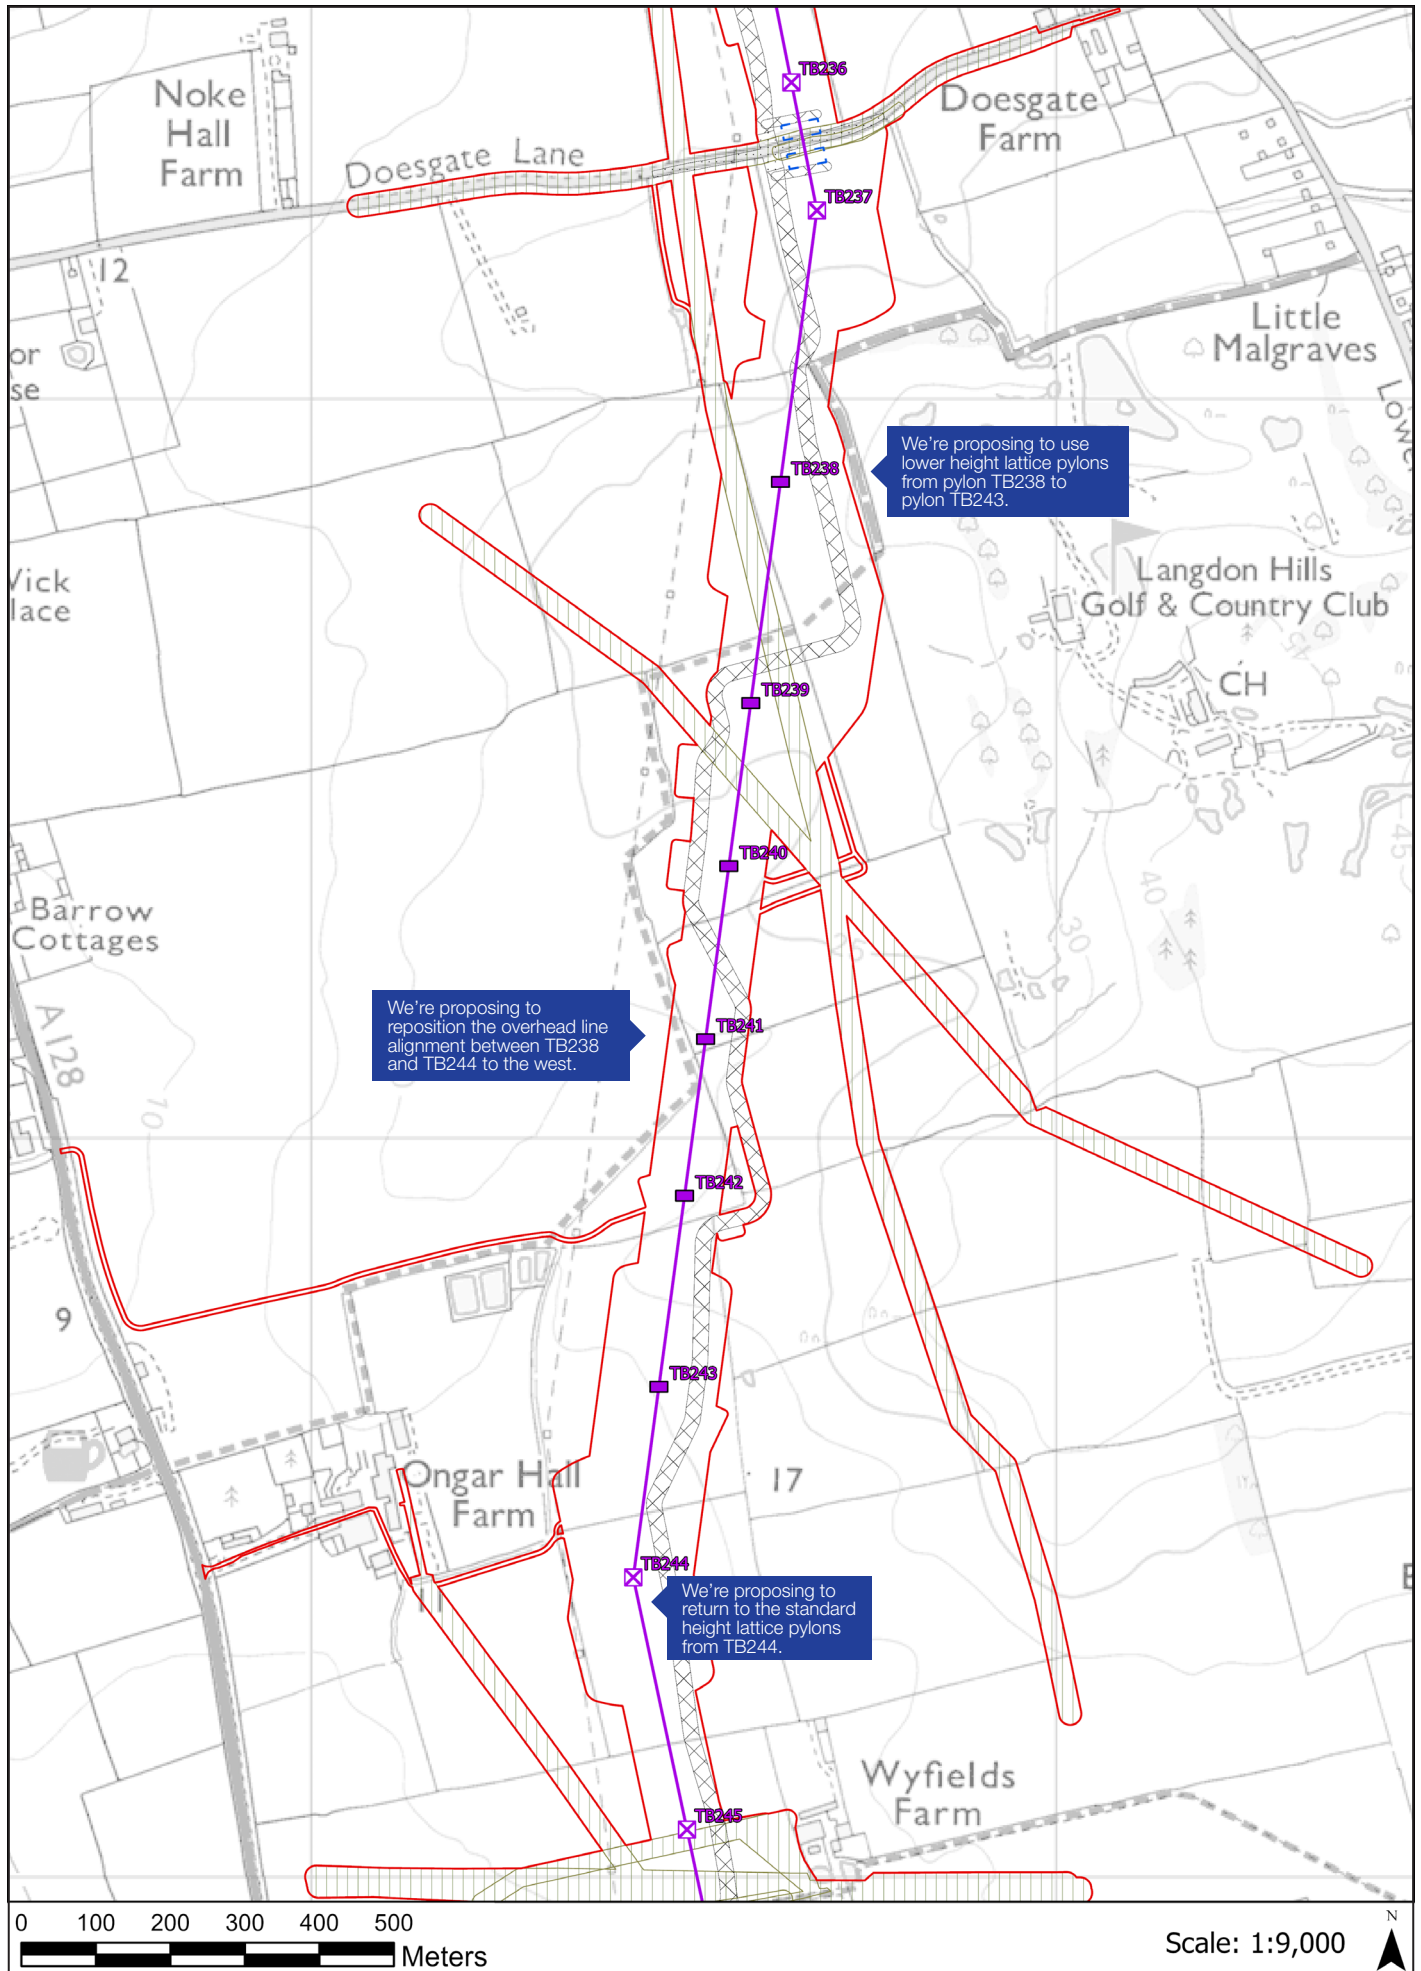

- the continuation of close paralleling with the 132 kV overhead line near Langdon Hills Golf Course
- aircraft taking off and landing at Thurrock airfield
- changing the locations where the overhead line would cross existing pipelines to ensure their continued safe operation.

The proposed order limits of the project have also been widened in some locations where the overhead line would cross existing infrastructure in response to ongoing engagement with the infrastructure providers. We are also proposing other minor amendments to the order limits.

Alignment presented at the 2024 statutory consultation

What are the environmental implications of the proposed changes?

The proposed changes would not materially change the conclusions that were reported within the Preliminary Environmental Information Report (PEIR) published as part of our summer 2024 consultation.

For more information on environmental implications, please see the Environmental Implications of Change document (EIC) with location reference **Thurrock 2**, where information on the environmental implications of the proposed change is provided and can be read alongside the information contained here.

If you received this leaflet in the post, the EIC will be enclosed. Alternatively, you can view the EIC on our website at nationalgrid.com/norwich-to-tilbury.

If, following careful consideration of any feedback we receive, we decide to make this change, baseline information, environmental surveys and assessments associated with this change will be provided in the Environmental Statement (ES) that will form part of our application for a Development Consent Order (DCO).

If you would like to see how the changes we are proposing at this location may look in the landscape, you can book a session with the community relations team to view our 3D model at **Bulphan Village Hall on 12 March between 2 pm and 5 pm**.

You can book by contacting us on any of the methods listed below.

Have your say

Our targeted consultation on the proposed changes at this location runs from **12 noon 25 February 2025 to 27 March 2025**.

If you have any comments regarding this proposed change, you can provide feedback by using the location reference **Thurrock 2**.

Feedback can be provided by:

Completing an online feedback questionnaire: nationalgrid.com/norwich-to-tilbury

Filling out a paper feedback questionnaire and sending it to the Freepost address below – if you haven't been sent one, please call us on: **0800 915 2497** and we will post one to you

Sending us an email: contact@n-t.nationalgrid.com

Writing to us (no stamp required) at: **FREEPOST N TO T**

Attend a webinar

To give people an opportunity to ask the project team questions, we are holding three webinars via Microsoft Teams.

The webinars which will cover this change will be held on **18 March 2025 at 12 noon and at 6:00 pm**.

You can sign up for a webinar on our website: nationalgrid.com/norwich-to-tilbury

- Essex – 17 March 2025 at 6:00 pm
- Essex and Thurrock – 18 March 2025 at 12 noon
- Thurrock – 18 March 2025 at 6:00 pm

You can also call us on: **0800 915 2497** if you have any questions.

Visit our website

nationalgrid.com/norwich-to-tilbury where you will find maps, consultation materials, and our online feedback questionnaire.

The deadline for feedback is 11:59 pm on 27 March 2025.
